Site Cash Management – User Guide

For Site Manager

August 2026

Introduction Site Cash Management

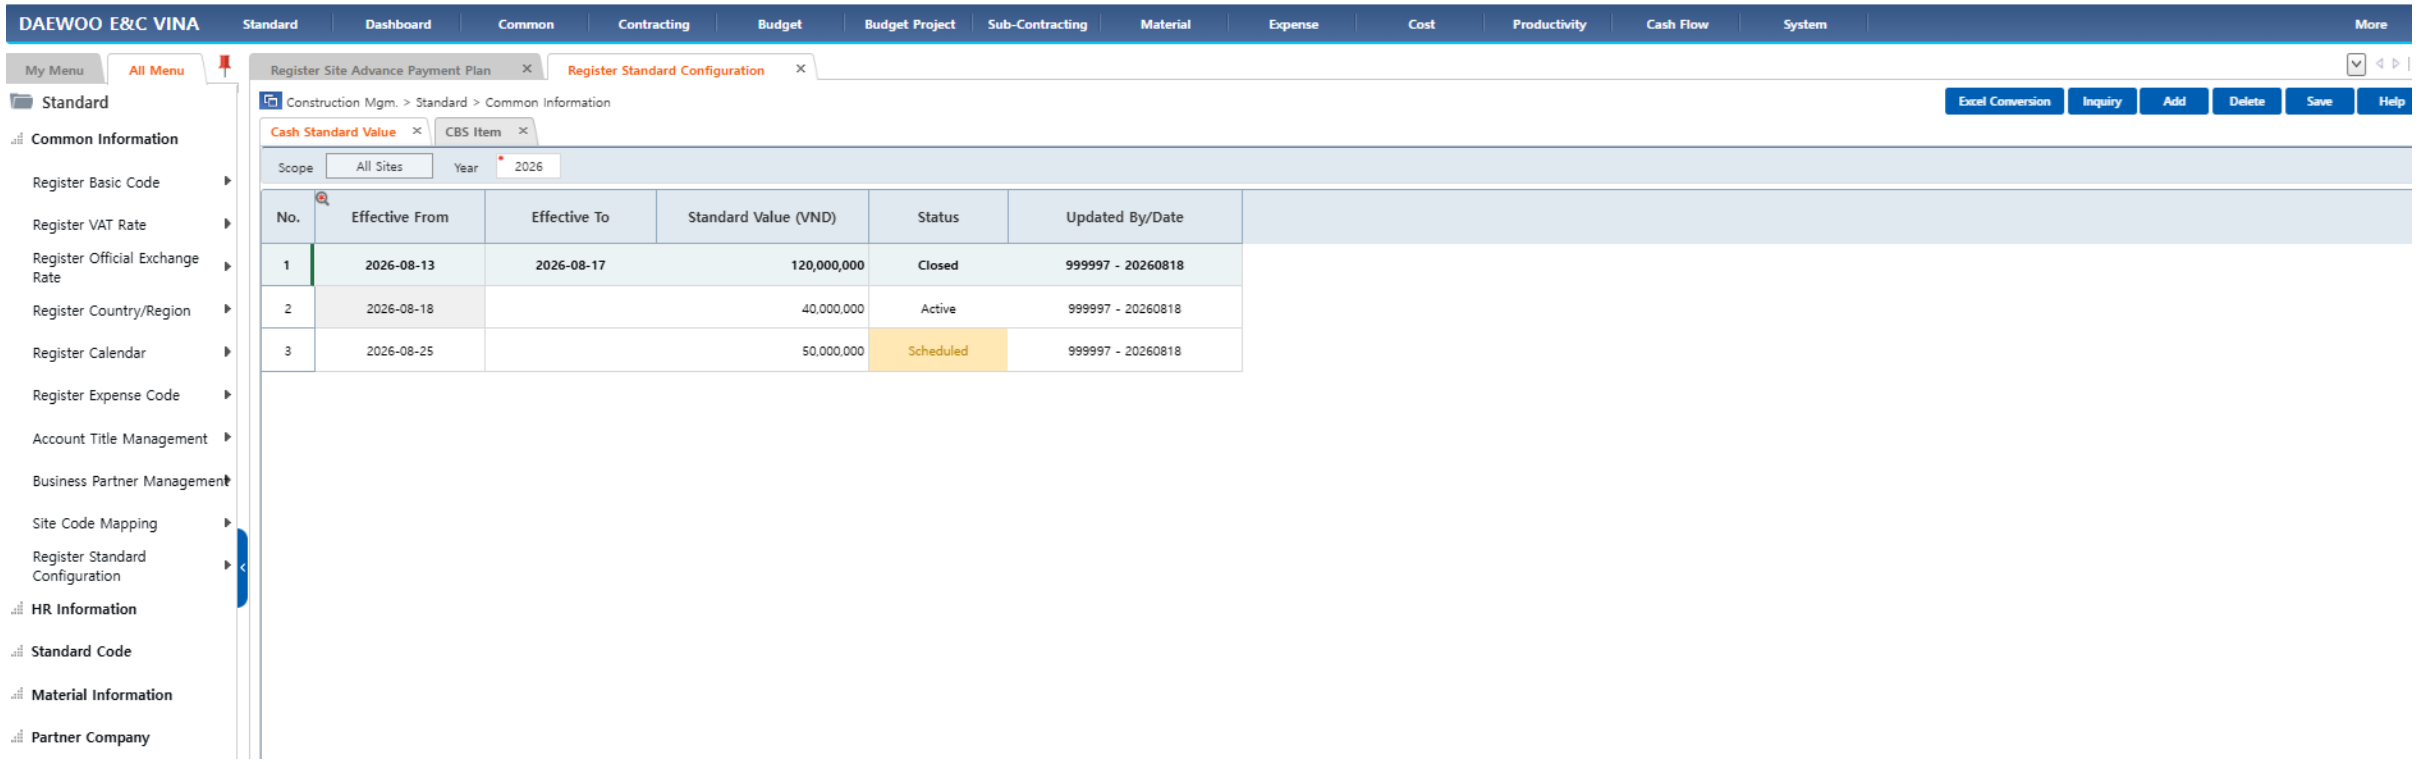

- **Purpose:** This guide shows the steps for Site Managers to configure site cash standards, approve fund requests on Groupware, and review the monthly cash summary report in PIMS.
- **Audience:** Site Managers responsible for cash configuration, fund approval, and monthly reporting.
- **Workflow:** Register Standard Configuration > Approve Site Fund Request on Groupware > Monthly Site Cash Management (view report).
- **Access:** Log in to PIMS, then use the top menu **Standard > Common Information** for configuration and **Expense > Expense Performance** for the monthly report. Approve fund requests directly on **Groupware**.
- **Prerequisites:** A valid PIMS account with Site Manager access rights, and Standard CBS Codes already set up under **Register Standard CBS Codes**.

1

Register Standard Configuration

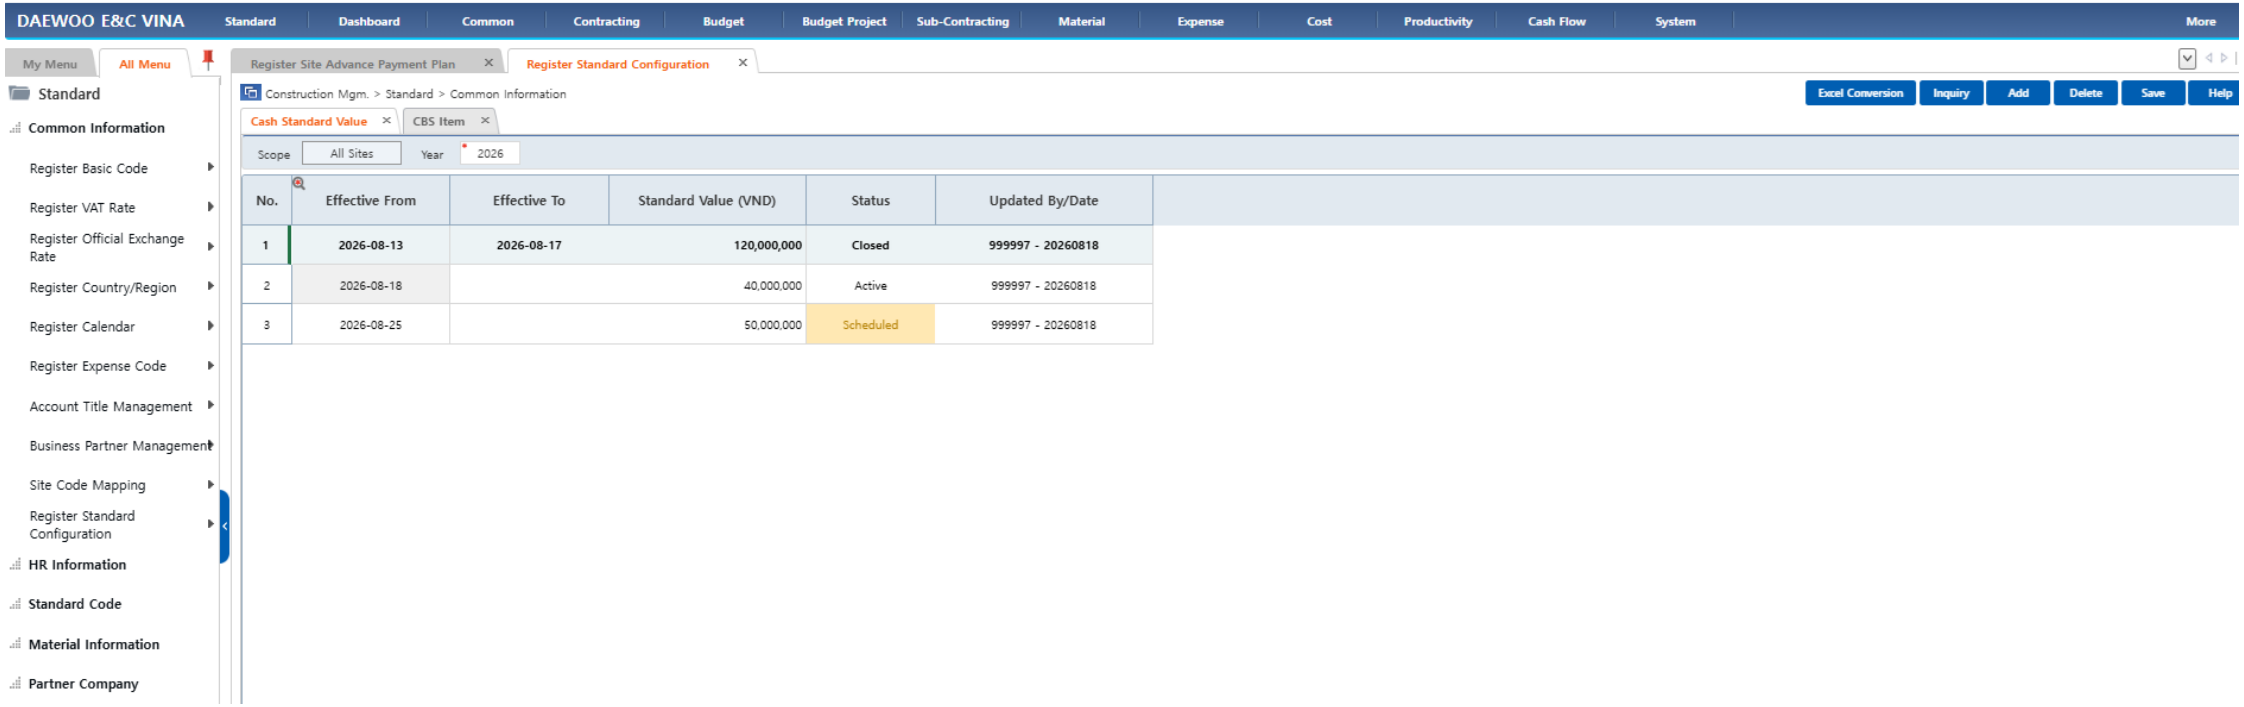

Register Standard Configuration: Cash Standard Value

- Go to **Standard > Common Information > Register Standard Configuration**. The screen loads with two tabs: **Cash Standard Value** and **CBS Item**. *No need to click Inquiry first — data loads automatically.*
- All settings apply globally to **All Sites** — no site-specific configuration is required.
- In the **Cash Standard Value** tab, set the standard per-transaction cash limit by effective date range.
- Select a **Year** from the filter to view records for that year, then click **Add** to create a new record. Enter **Effective From** and **Standard Value (VND)**, then click **Save**.

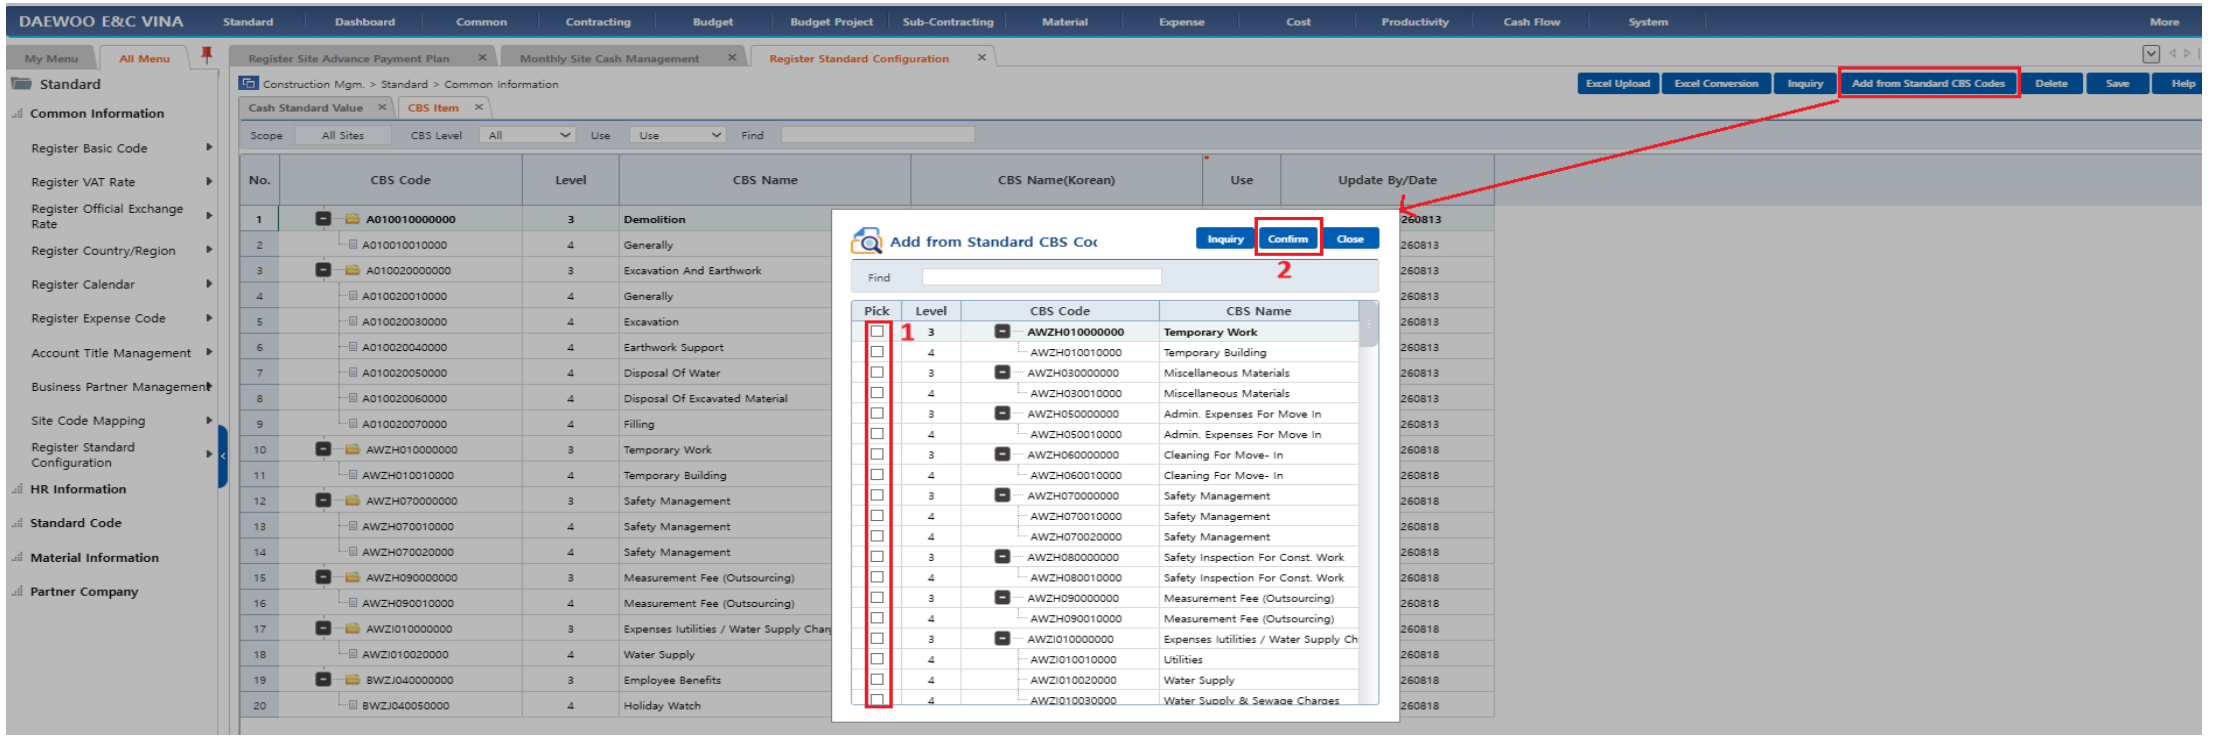

Register Standard Configuration: Cash Standard Value

- *Only one record can be Active at any given time. If the current Active record has no Effective To date (open-ended), the system automatically closes it by setting its Effective To = new Effective From – 1 day.*
- *If the current Active record already has a specific Effective To date that overlaps with the new record, the system rejects the new entry — adjust the existing record's Effective To first.*
- *Standard Value cannot be edited directly on an Active record. To update the value, add a new record with the desired Effective From date.*
- The **Status** column is system-calculated: **Active** (currently in effect) / **Scheduled** (future date) / **Closed** (expired). This column is read-only.
- *A gap between two effective periods is allowed. The system will display a non-blocking warning when a gap is detected.*

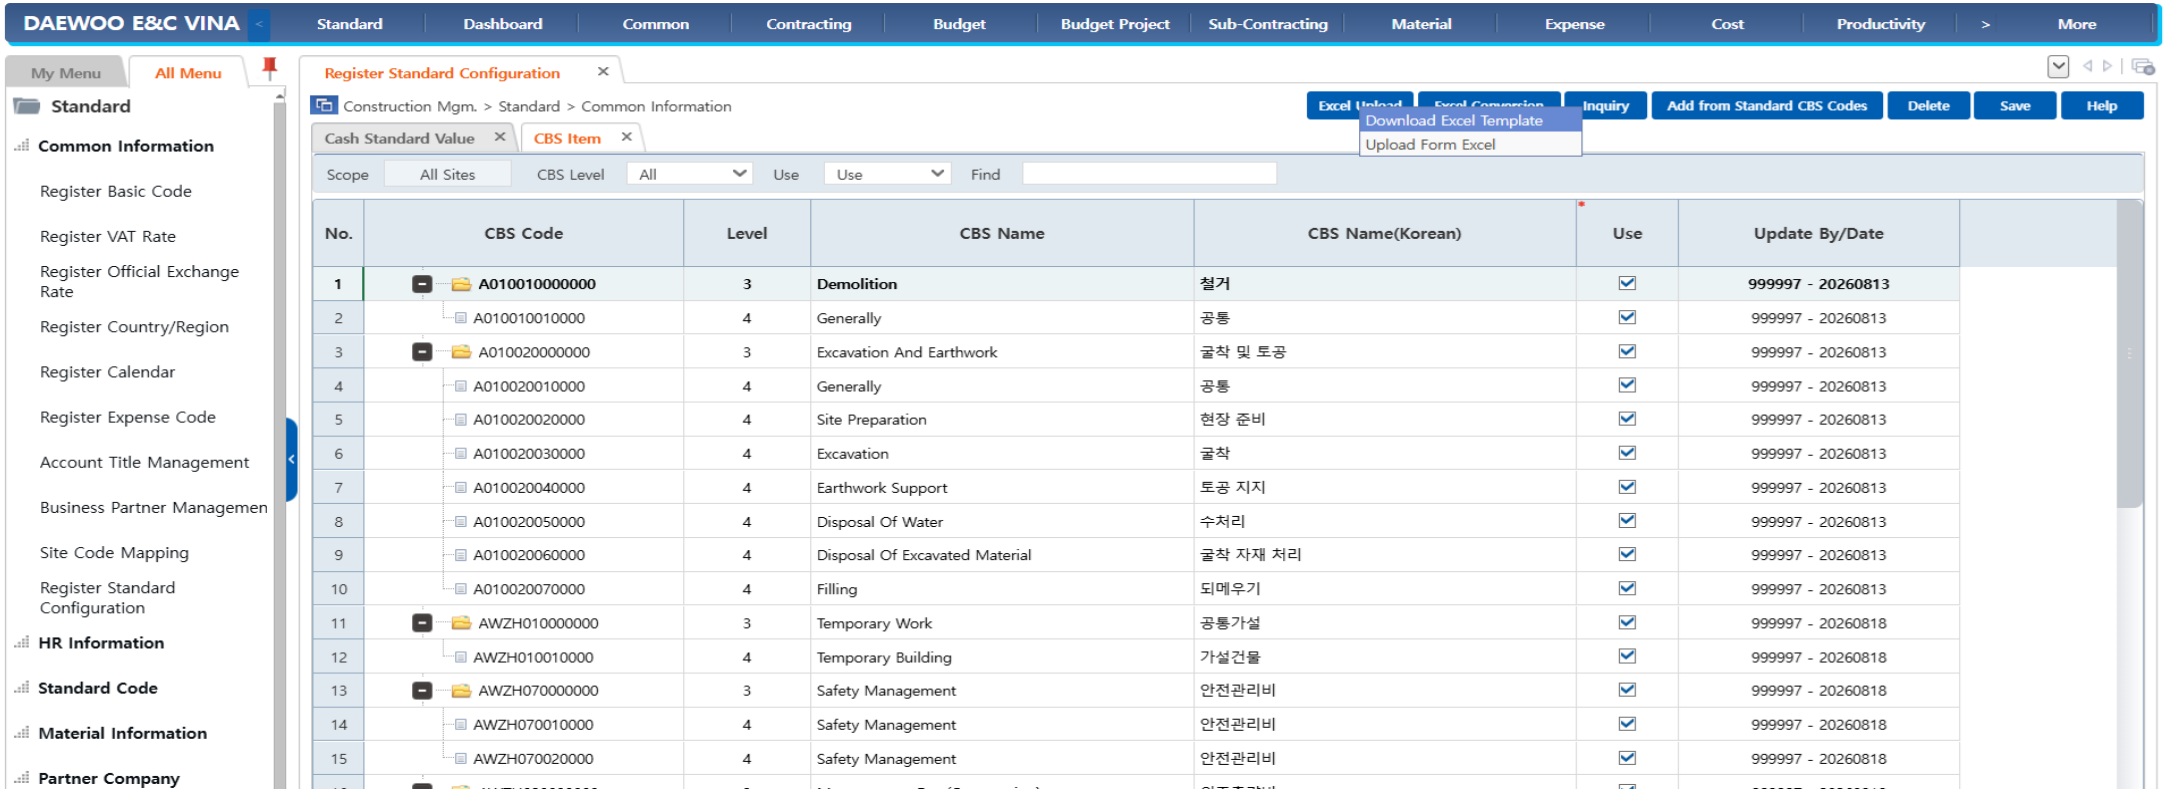

Register Standard Configuration: CBS Item

- Click the **CBS Item** tab to manage the global list of CBS codes available for site expense entry.
- CBS items are sourced exclusively from **Common Works**, **Expenses I** (Direct Costs), and **Expenses II** (Indirect Costs) branches of **Register Standard CBS Codes**.
- Click **Add from Standard CBS** to open the selection popup. Items are grouped by Level 2 branch (Common Works / Expenses I / Expenses II) for easy navigation.
  - Tick one or more **Level 3** or **Level 4** items using the **Pick** checkbox, then click **Confirm**.
  - *Selecting a Level 4 item automatically includes its Level 3 parent if not already in the list.*
  - *Selecting a Level 3 item automatically includes all its Level 4 child items.*
  - *Duplicate CBS Codes are not added again.*

Register Standard Configuration: CBS Item

- To import CBS items in bulk: click **Excel Upload** > **Download Excel Template**, fill in CBS Codes, then **Upload Form Excel**. *The system applies all-or-nothing logic — if any row is invalid, no rows are imported. Error details are returned in the file.*
- Use the **Use** checkbox on each row to activate or deactivate an item. *Only items with Use = checked will appear in Register Site Advance Payment Plan and Register Site Actual Expense.*
- Use the **CBS Level** and **Find** filters to narrow the list. Click **Inquiry** to refresh.
- Click **Save** to apply all changes.
- *A Level 3 item cannot be deleted if any of its Level 4 items have already been used in other screens.*

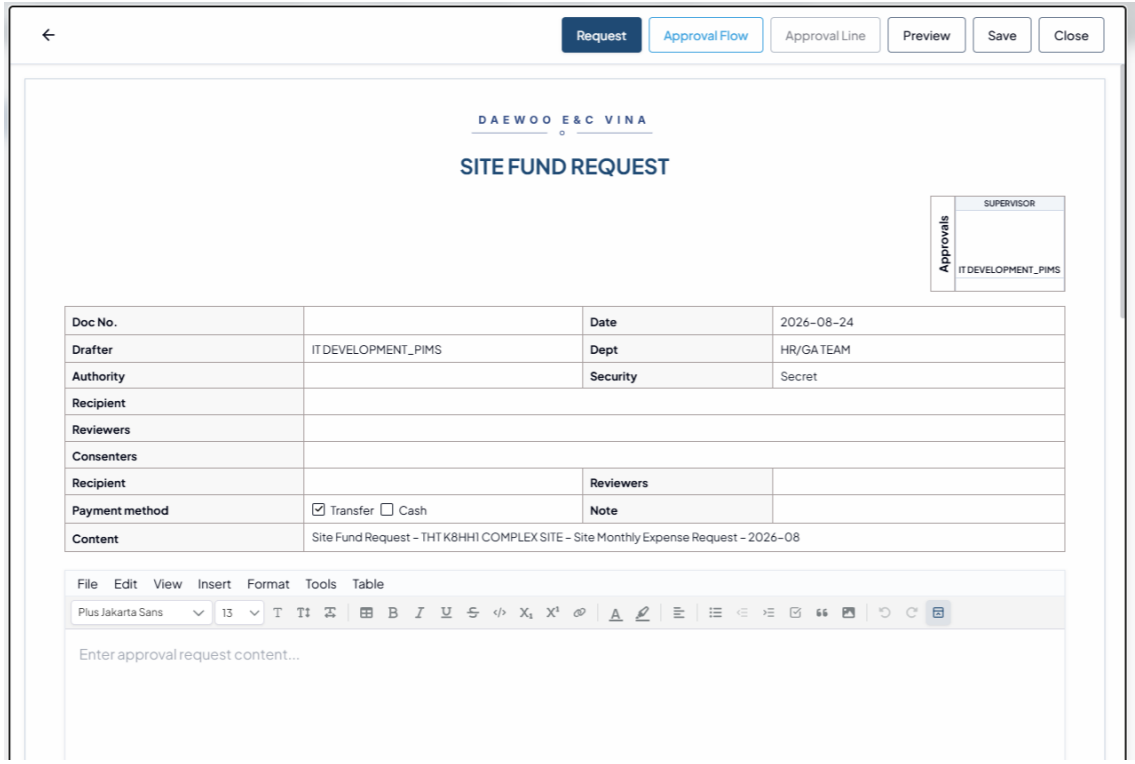

No.	CBS Code	Level	CBS Name	CBS Name(Korean)	Use	Update By/Date
1	A010010000000	3	Demolition	철거	☑	999997 - 20260813

Approve on Groupware – Site Fund Request

Approve on Groupware: Site Fund Request

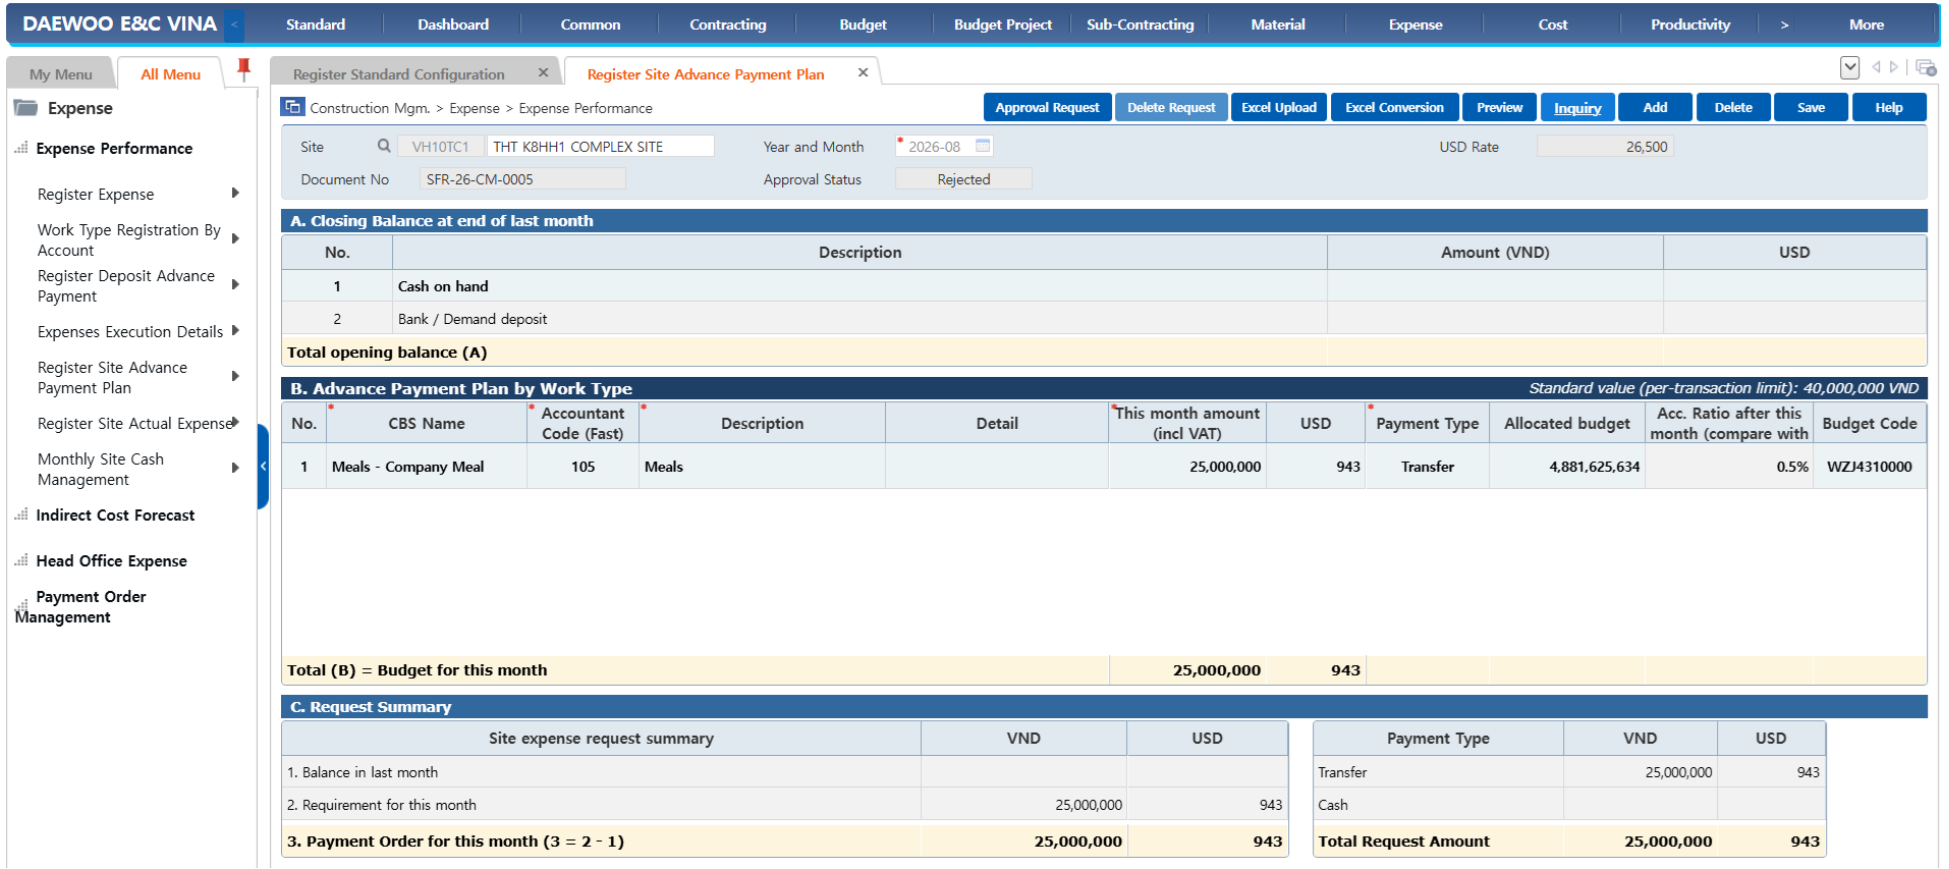

- When a Site Staff submits an Advance Payment Plan from PIMS, the system automatically creates a **Site Fund Request** on Groupware and provides a direct link.
- Open the link and review the form before proceeding to Submit:
  - **Header**: Dept (Site Name), Date, Requestor, Payment method (Transfer / Cash / Both, derived from Payment Type in the plan).
  - **Summary**: Transfer fund and Cash fund amounts, totaled by Payment Type. *Values are summed from Section B of the plan — not offset against the opening balance.*
  - **Detail**: Line-by-line CBS breakdown mapped directly from Section B of the plan.
  - **Attachment**: PDF of the Advance Payment Plan (auto-attached by PIMS). *Additional files may be added directly on Groupware.*

Approve on Groupware: Site Fund Request

- *The Site Fund Request data is read-only on Groupware — it cannot be edited by Groupware users. Only attachments may be supplemented.*
- Submit the request through the Groupware approval chain. The approval result (Approved / Rejected) is automatically synced back to PIMS.
- *If the request is Rejected on Groupware, PIMS unlocks the plan (Status = Rejected) for revision and resubmission.*

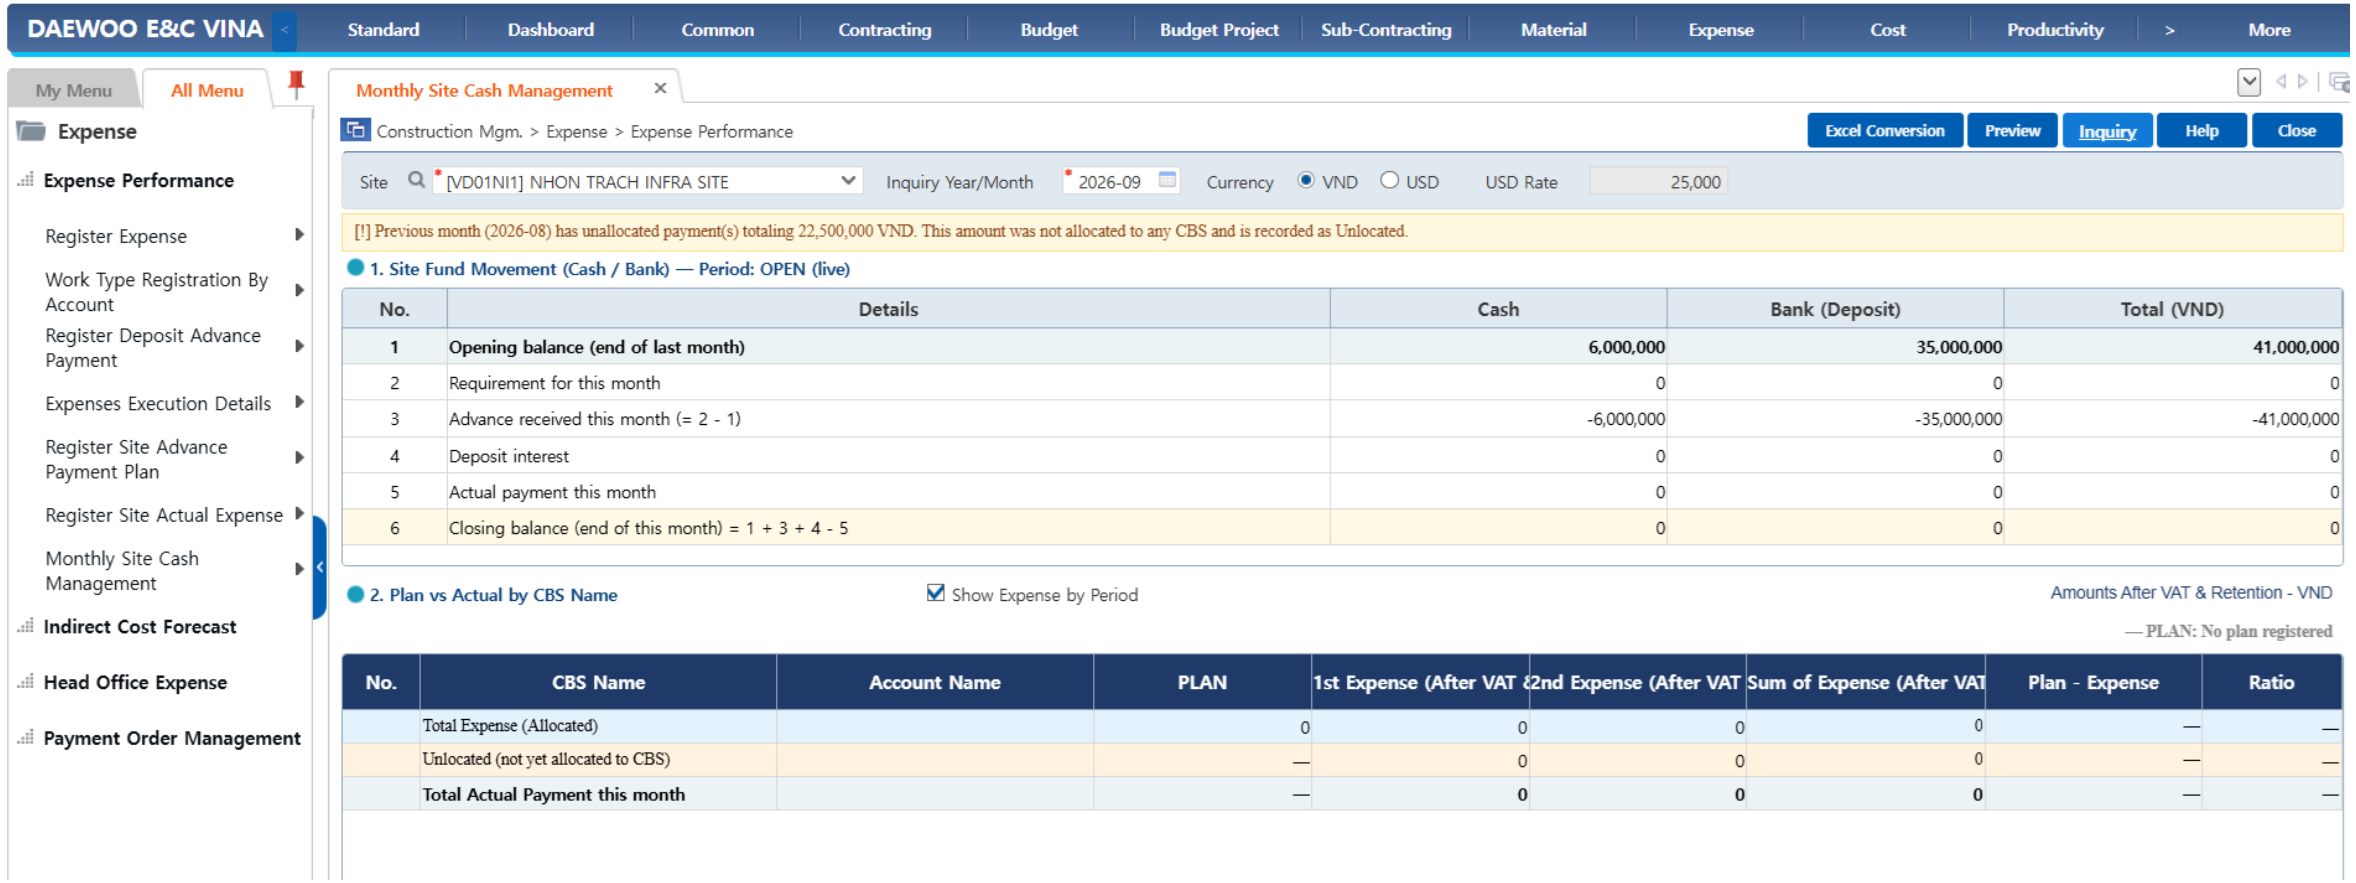

3

Monthly Site Cash Management

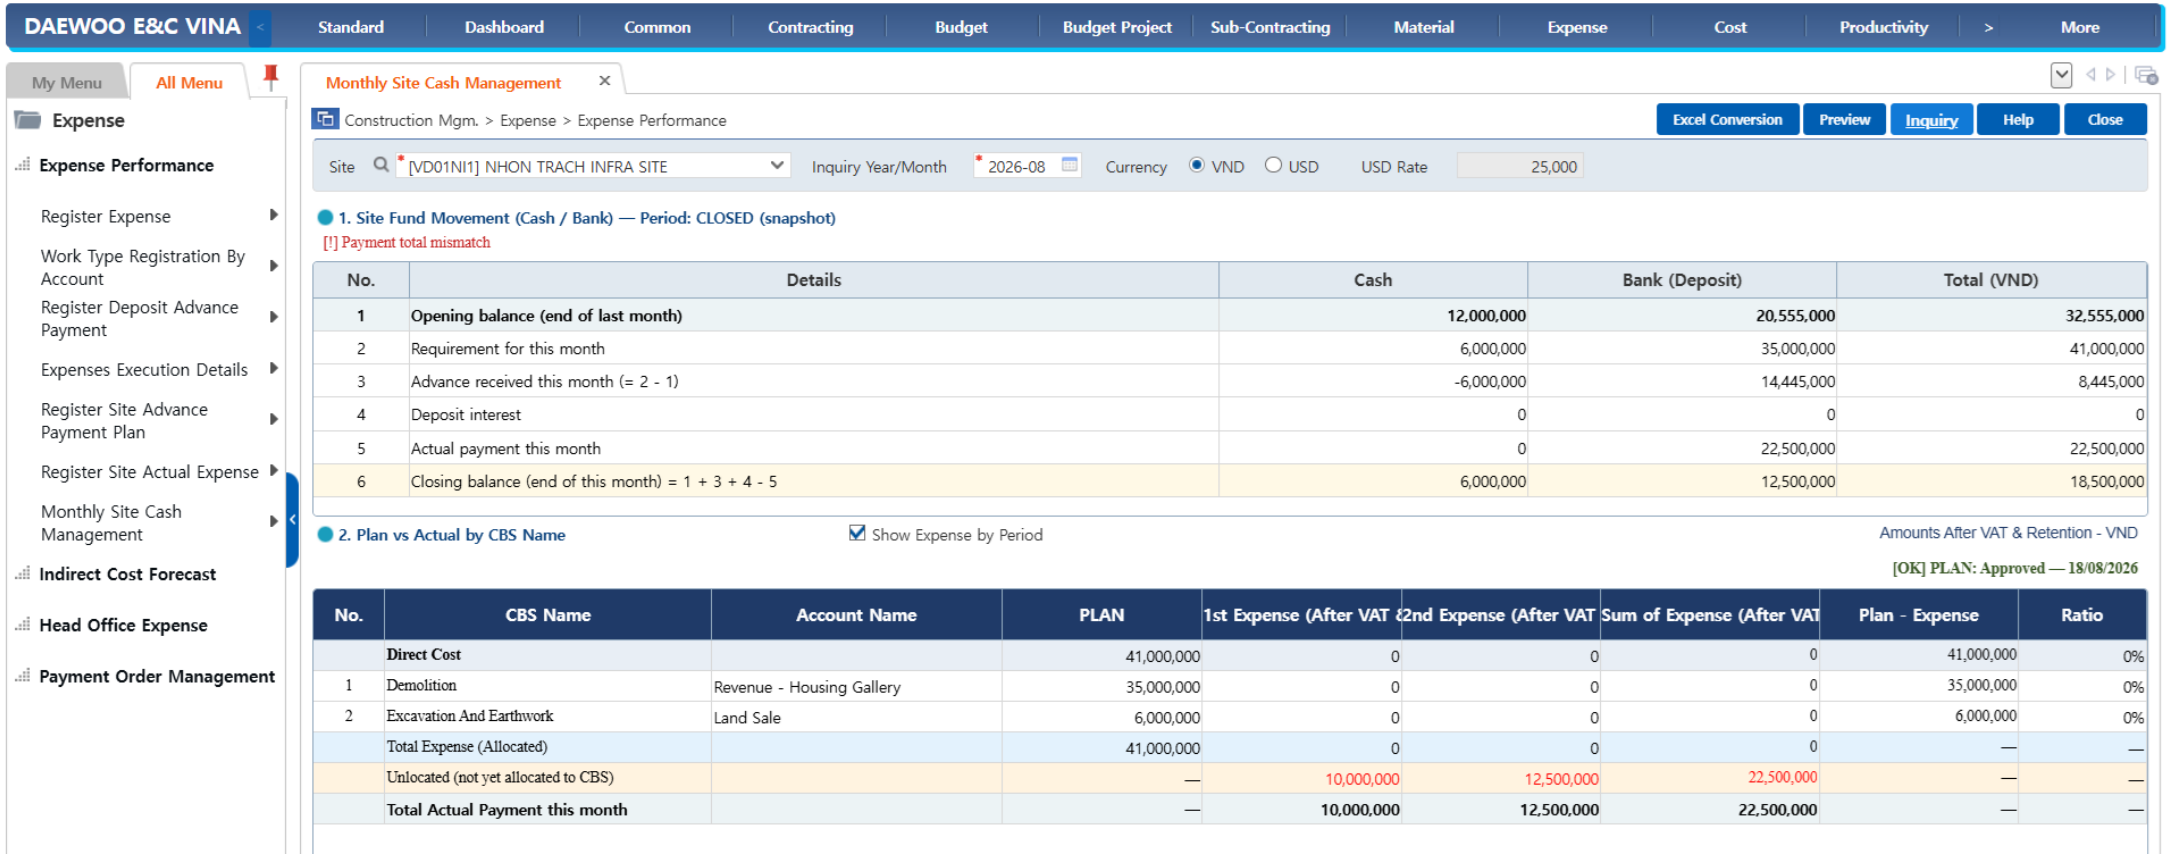

Monthly Site Cash Management

- Go to **Expense > Expense Performance > Monthly Site Cash Management**.
- Select **Site**, **Year and Month**, **Currency** (VND or USD), and **USD Rate** (auto-populated from Register Official Exchange Rate), then click **Inquiry**. *This report is read-only.*
- *If the previous month has unallocated payments (Unlocated > 0), a Warning Banner appears above Section 1 showing the total unallocated amount for that month.*

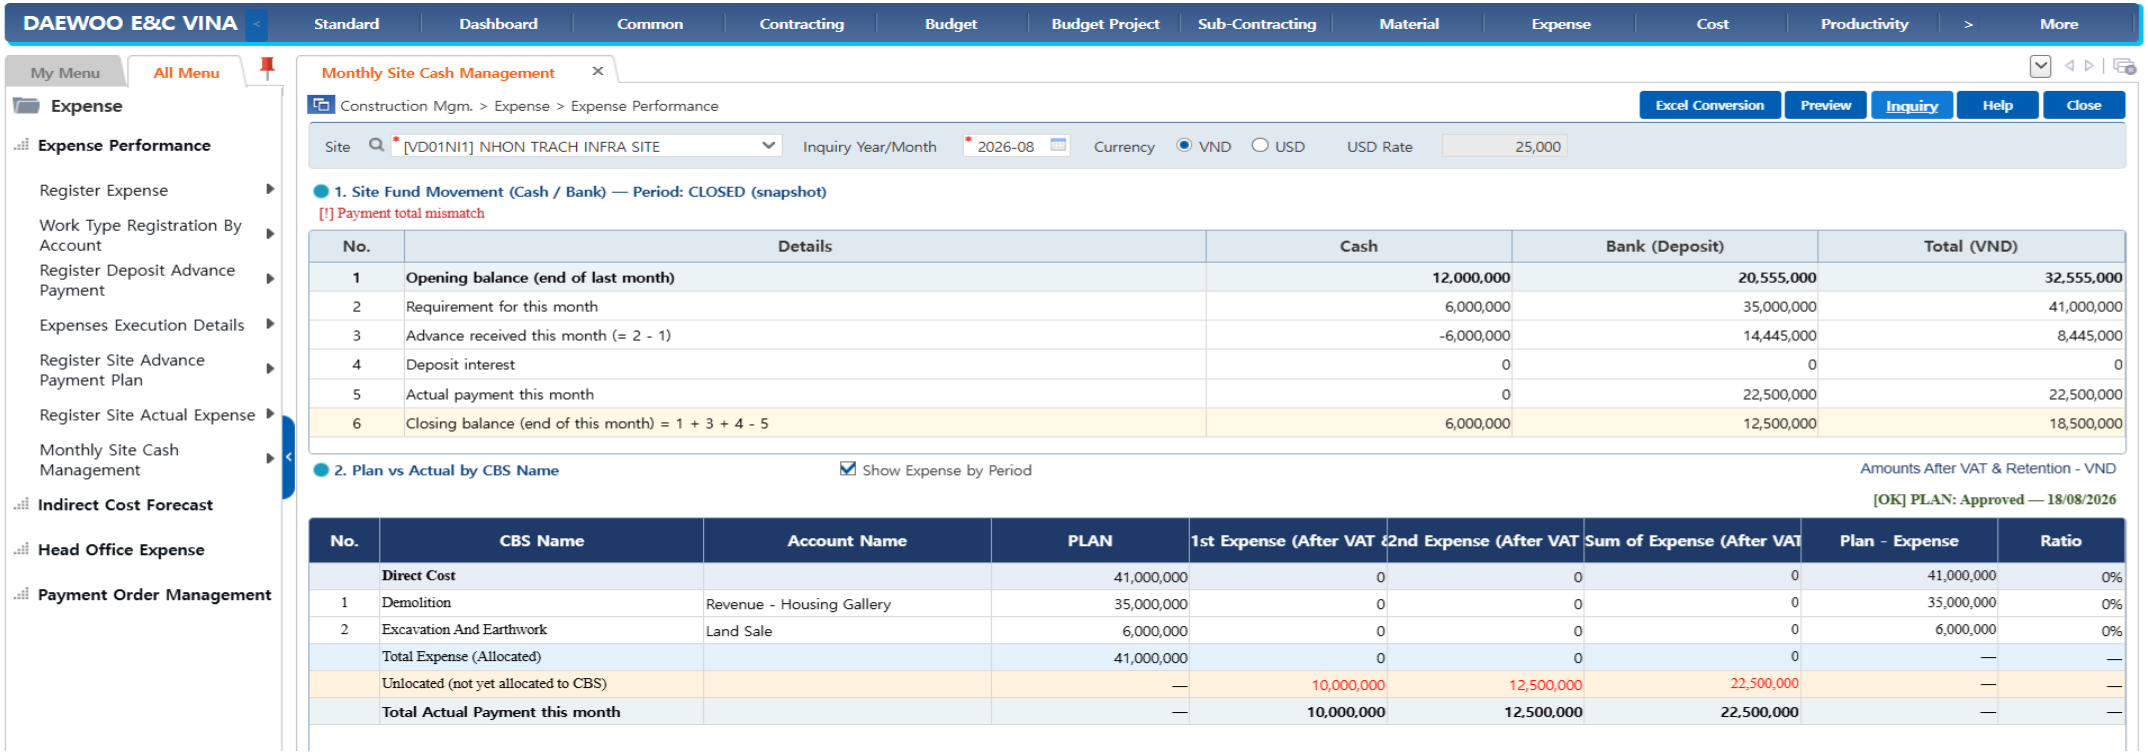

Monthly Site Cash Management

- **Section 1 — Site Fund Movement** (Cash / Bank) summarizes the fund position for the selected month: **Opening balance**: carried from the Closing balance of month N-1.
- **Requirement for this month**: from the Approved Advance Payment Plan (split by Transfer / Cash).
- **Advance received** = Requirement − Opening balance.
- **Deposit interest**: summed from Transaction List (Cash Flow Type = Deposit Interest).
- **Actual payment this month**: total Outcome from Register Site Actual Expense Section A (Allocated + Unallocated).
- **Closing balance** = Opening + Advance received + Deposit interest − Actual payment.

Monthly Site Cash Management

- **Section 2 — Plan vs Actual by CBS Name** shows a line-by-line comparison of planned vs. actual amounts by CBS:
  - Columns displayed: **PLAN**, **1st Expense**, **2nd Expense**, **Sum of Expense** (After VAT & Ret.), **Plan – Expense**, **Ratio (Expense / Plan)**.
  - Tick **Show Expense by Period** to show or hide the 1st and 2nd Expense columns.
  - A **Plan Status Indicator** shows: ✓ Approved / ⚠ Draft (pending approval) / — Not yet planned.
  - Footer rows: **Total Expense (Allocated)**, **Unlocated** *(amounts not allocated to any CBS — shown in red if > 0)*, and **Total Actual Payment this month** *(= Total Expense Allocated + Unlocated; must match Row 5 of Section 1)*.
- Click **Preview** to open a read-only PDF report (Download / Print / Close available inside the viewer).
- Click **Excel Conversion** to export the report to Excel.

No.	Details	Cash	Bank (Deposit)	Total (VND)
1	**Opening balance (end of last month)**	**12,000,000**	**20,555,000**	**32,555,000**
2	Requirement for this month	6,000,000	35,000,000	41,000,000
3	Advance received this month (= 2 - 1)	-6,000,000	14,445,000	8,445,000
4	Deposit interest	0	0	0
5	Actual payment this month	0	22,500,000	22,500,000
6	Closing balance (end of this month) = 1 + 3 + 4 - 5	6,000,000	12,500,000	18,500,000

No.	CBS Name	Account Name	PLAN	1st Expense (After VAT &	2nd Expense (After VAT	Sum of Expense (After VAT	Plan - Expense	Ratio
	Direct Cost		41,000,000	0	0	0	41,000,000	0%
1	Demolition	Revenue - Housing Gallery	35,000,000	0	0	0	35,000,000	0%
