Site Cash Management – User Guide

For Site Staff

August 2026

Introduction Site Cash Management

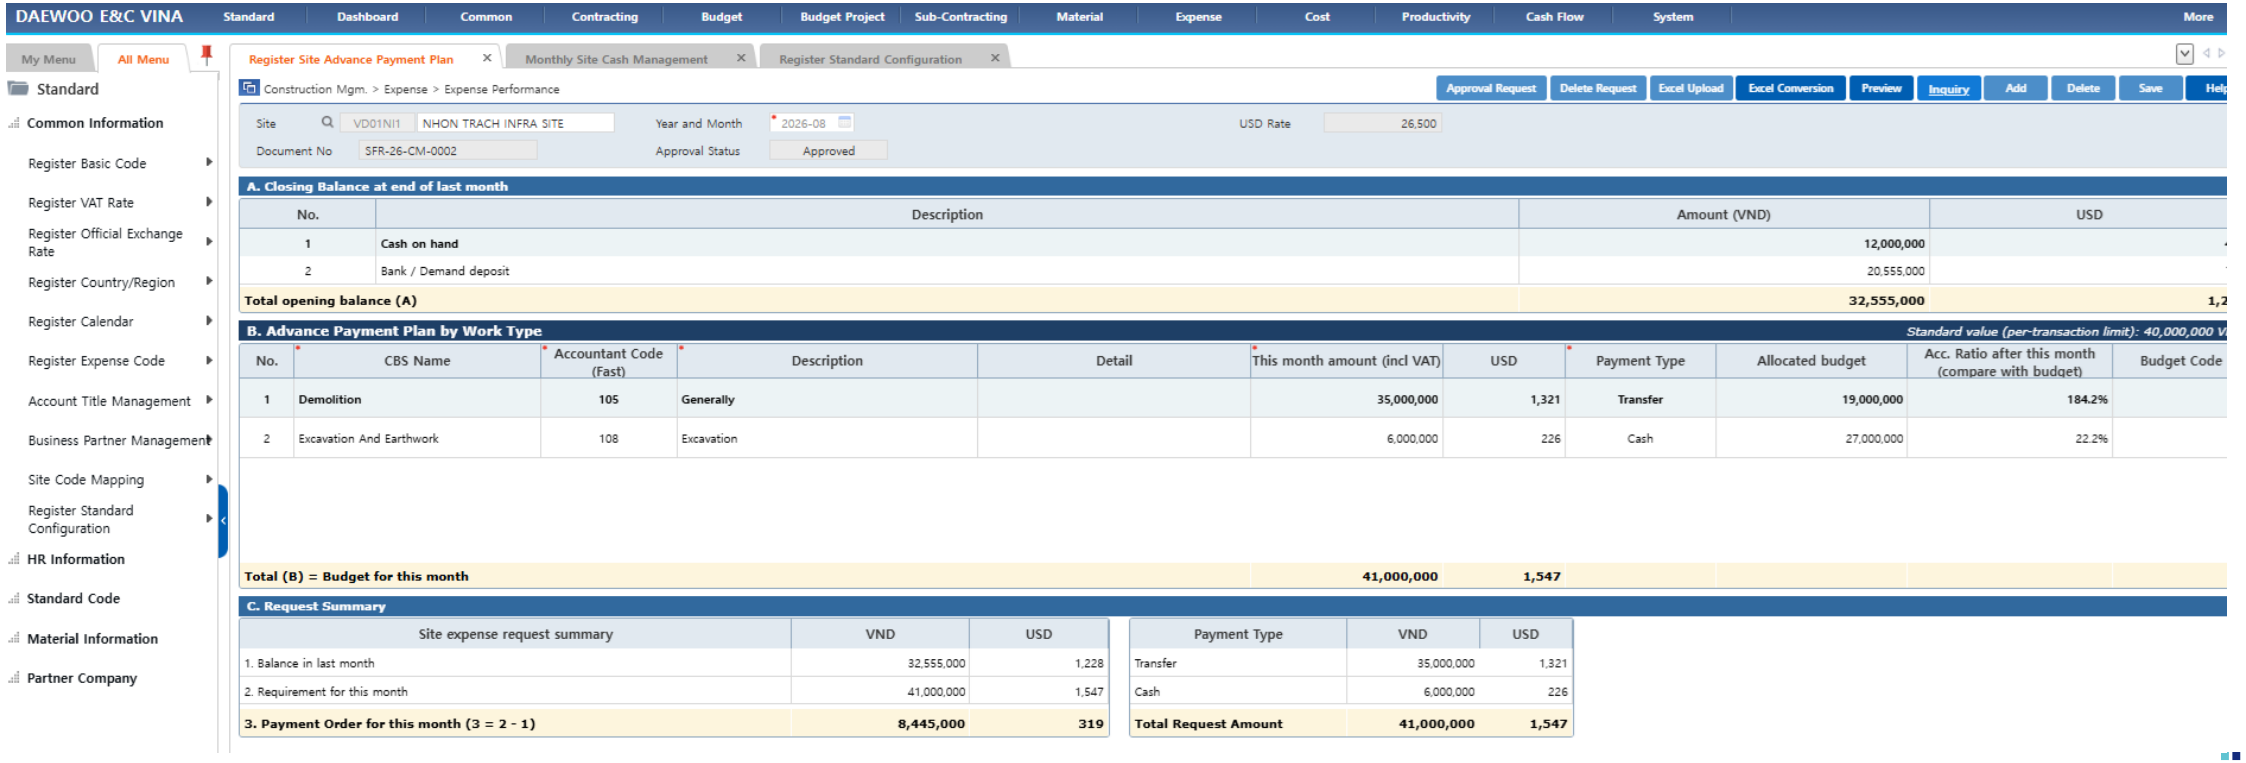

- **Purpose:** This guide shows the steps for Site Staff to create monthly advance payment plans, submit fund requests for approval, record actual site expenses, and view the monthly cash summary report in PIMS.
- **Audience:** Site Staff (site employees) responsible for expense planning, actual expense recording, and fund request submission.
- **Workflow:** Register Site Advance Payment Plan > Submit for Approval on Groupware (Site Fund Request) > Register Site Actual Expense > Monthly Site Cash Management (view report).
- **Access:** Log in to PIMS, then use the top menu **Expense > Expense Performance** for all operational screens. Submit fund requests via the **Groupware** link generated by PIMS.
- **Prerequisites:** A valid PIMS account with Site Staff access rights, and the previous month (N-1) already closed on **Site Cost Closing** before creating a new advance payment plan.

1

Register Site Advance Payment Plan

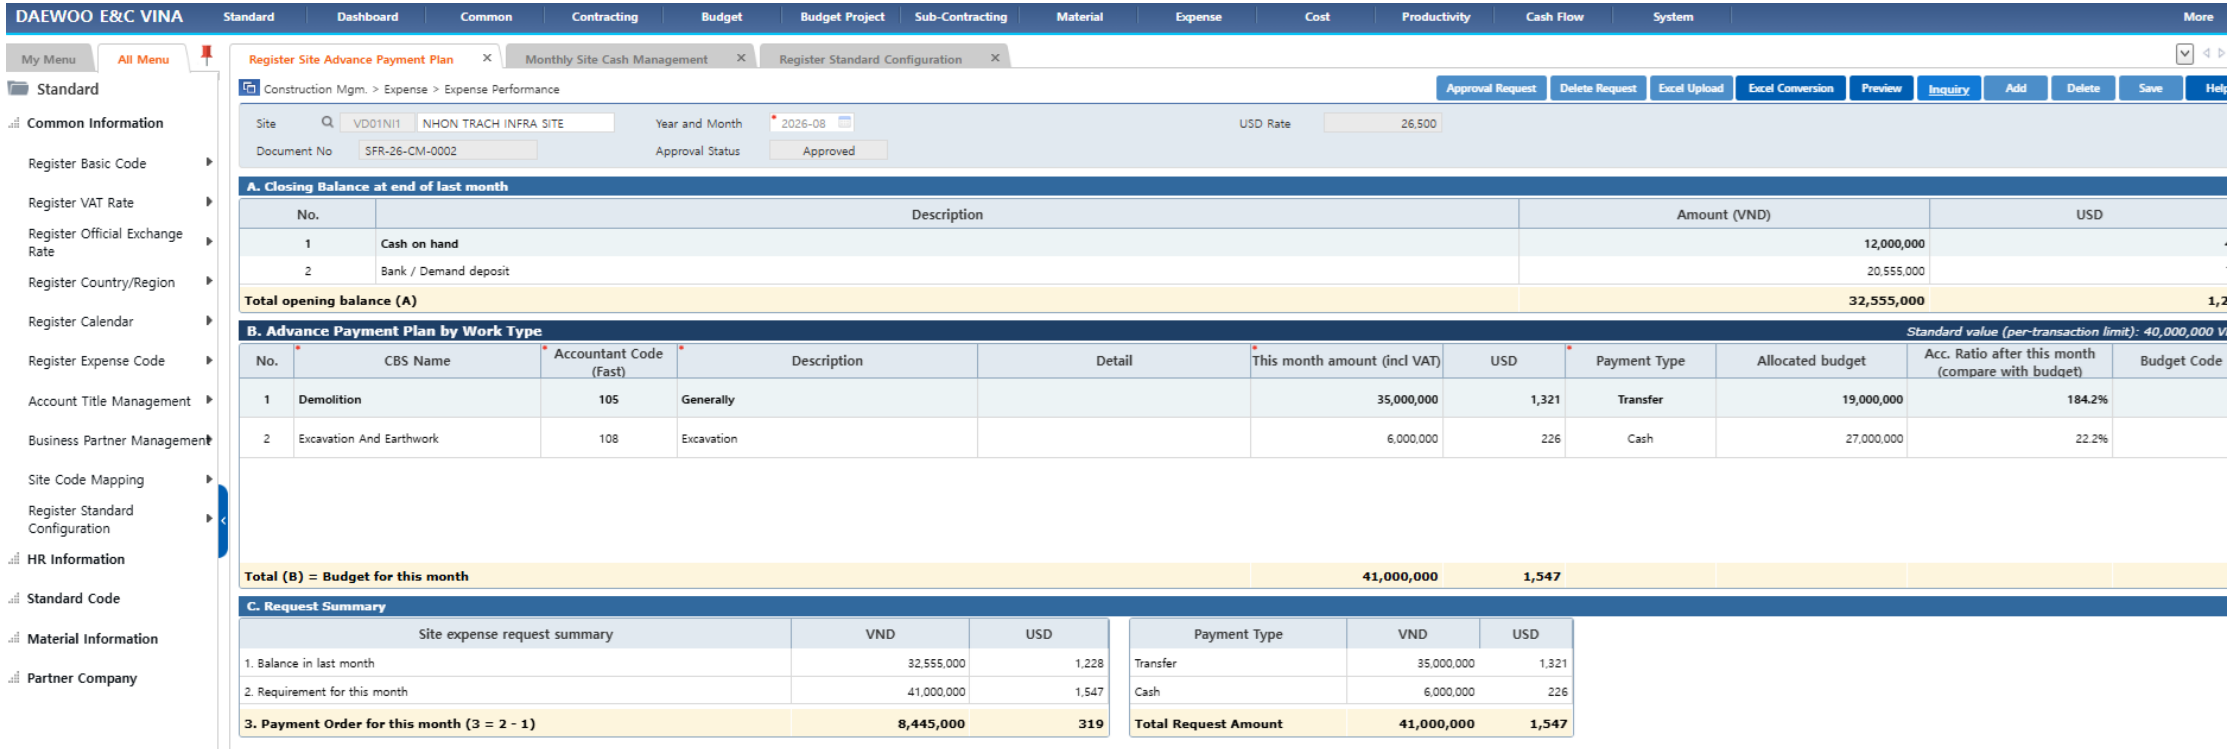

Register Site Advance Payment Plan

- Go to **Expense > Expense Performance > Register Site Advance Payment Plan**.
- Select **Site** and **Year and Month**, then click **Inquiry**. If no plan exists for that month, a blank form opens; if one exists, it loads in its current status.
- *The previous month (N-1) must be closed (Site Expenses = true on Site Cost Closing) before a plan for the current month can be created or saved.*
- Section A — **Closing Balance at end of last month** is automatically populated from the Site Cost Closing of the previous month. *This section is read-only.*
- A **Standard Value** banner above Section B shows the current per-transaction cash limit.

Register Site Advance Payment Plan

- In Section B — **Advance Payment Plan**, click **Add Row** to enter expense items:
  - Select **CBS Name** (Level 3), **Accountant Code**, and **Description** (Level 4).
  - Enter **This month amount (incl. VAT)**. *Each row amount must not exceed the Standard Value — hard block on Save.*
  - Select **Payment Type**: **Transfer** or **Cash**. *Payment Type is mandatory for all rows before saving.*
  - *Amount per CBS Level 4 must not exceed the Allocated Budget — hard block on Save.*
- To import rows in bulk, click **Excel Upload** > **Download Excel Template**, fill in the template, then **Upload Form Excel**.
- Section C — **Request Summary** calculates automatically: Balance in last month, Requirement for this month, and Payment Order for this month (= Requirement − Balance).
- Click **Save** to save the plan at **Draft** status.

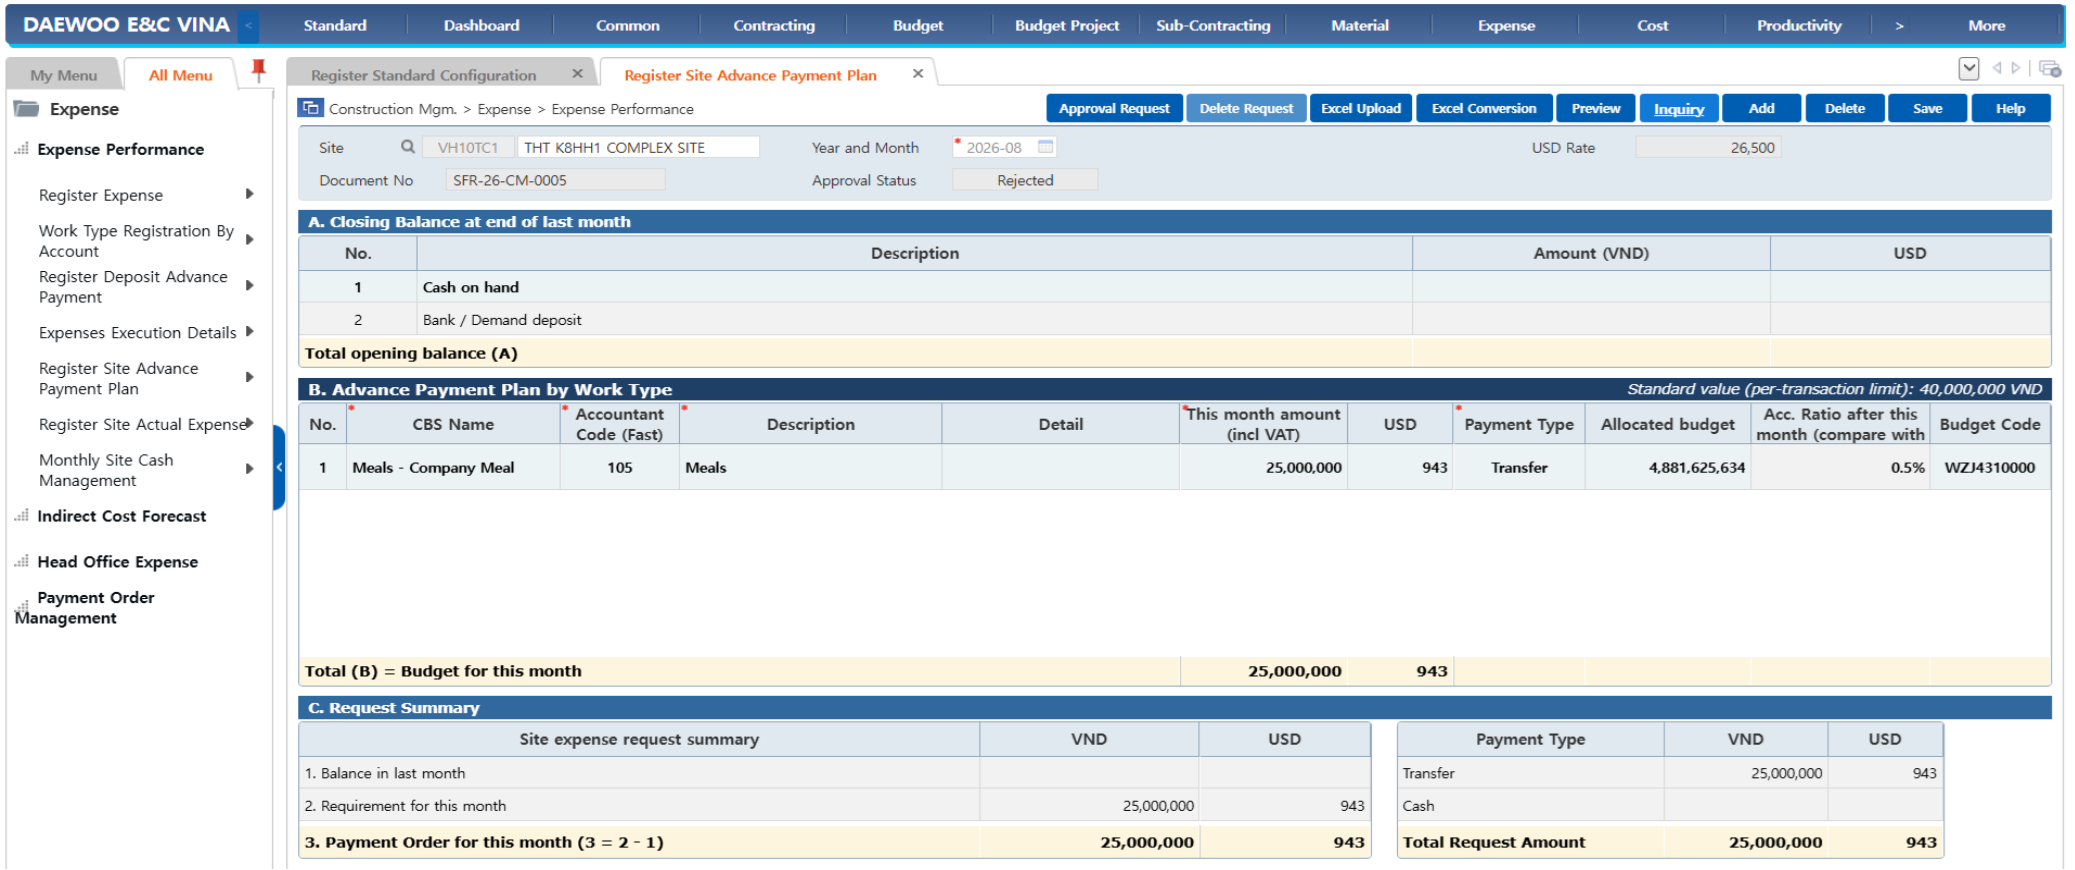

2

Submit for Approval on Groupware

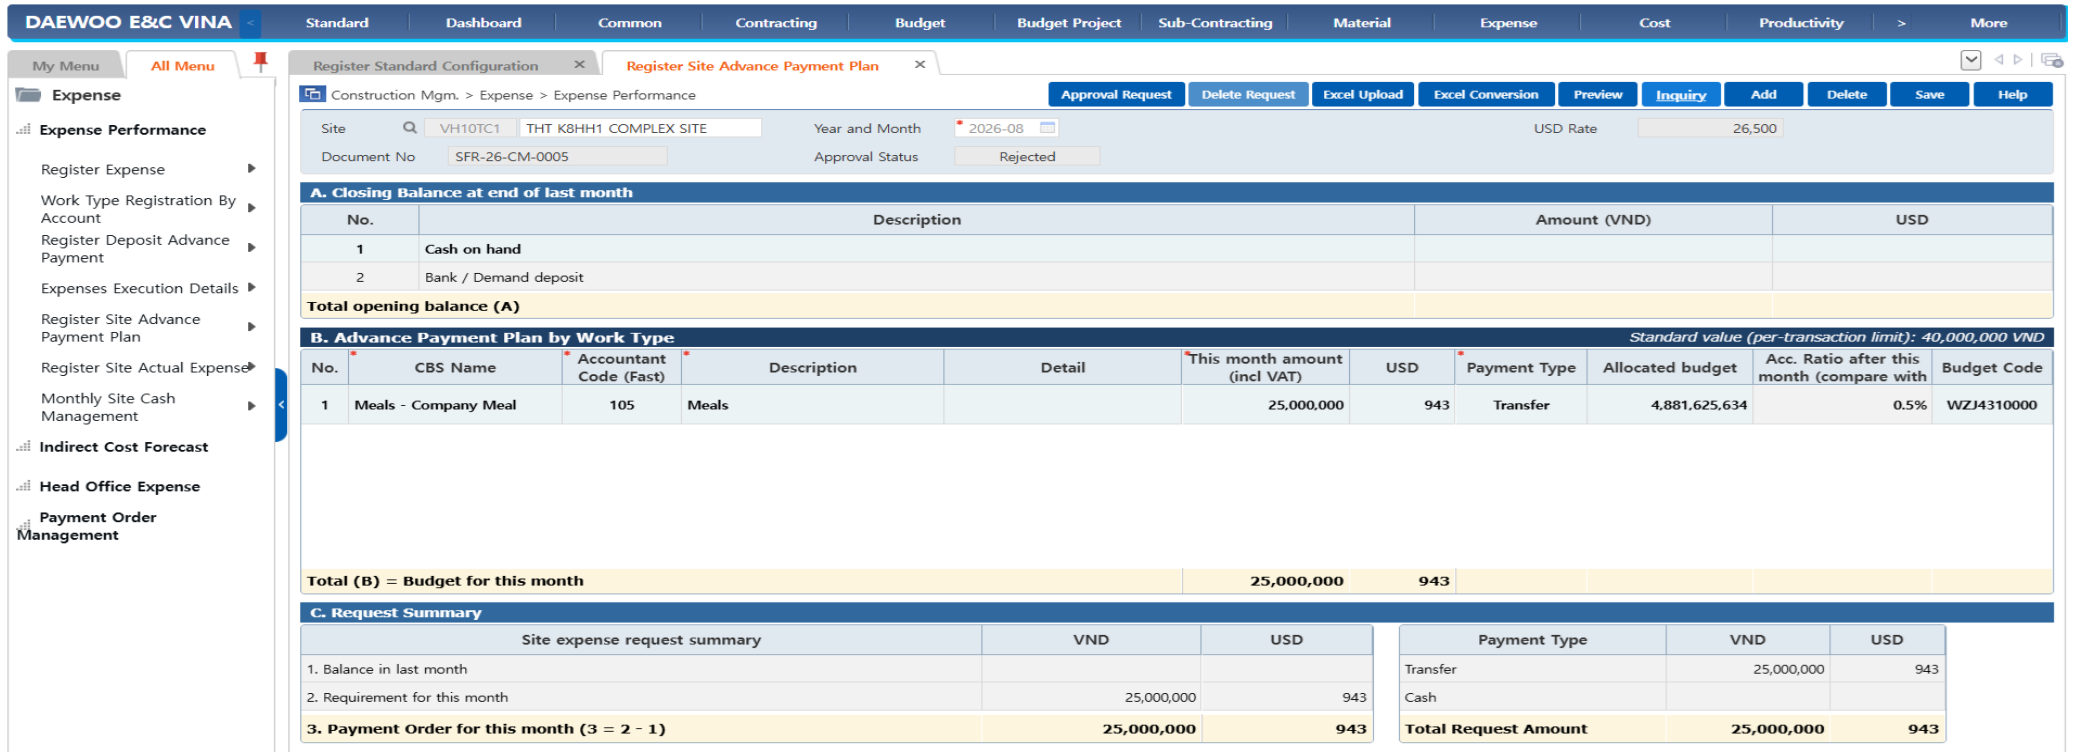

Register Site Advance Payment Plan – Submit for Approval

- Once the plan is saved and **Payment Order for this month > 0**, the **Approval Request** button becomes active. Click it to submit to Groupware.
- The system automatically determines the submission action based on the current Groupware status:
  - *No prior request → A new Site Fund Request is created on Groupware.*
  - *Existing request in Draft or Submission stage → The existing request is updated.*
  - *Request currently in the approval chain → Blocked. A message is displayed; resubmission is not allowed.*
  - *Previously Rejected request → A new Site Fund Request is created with a new Groupware Doc No.*

Register Site Advance Payment Plan – Submit for Approval

- After a successful API call, the system opens the Groupware link. **Go to Groupware and manually Submit the Site Fund Request.**
- *The PIMS plan is not locked immediately — it remains in Draft until Groupware sends a Submission callback.*
- Once submitted on Groupware, the plan status changes to **Approval Request** (locked — no further editing).
- If the request is **Approved** on Groupware, the plan becomes read-only (Status = Approved).
- If **Rejected**, the plan re-opens for editing (Status = Rejected). Revise and click **Approval Request** again — the system creates a new Site Fund Request.
- To delete the entire plan (Draft status only), click **Delete Request** and confirm. *This removes the full record; it is different from Delete Row, which only removes a single line in Section B.*
- Click **Preview** to view or download the Advance Payment Plan as a PDF. *Preview is available only after Save and does not change the plan status.*

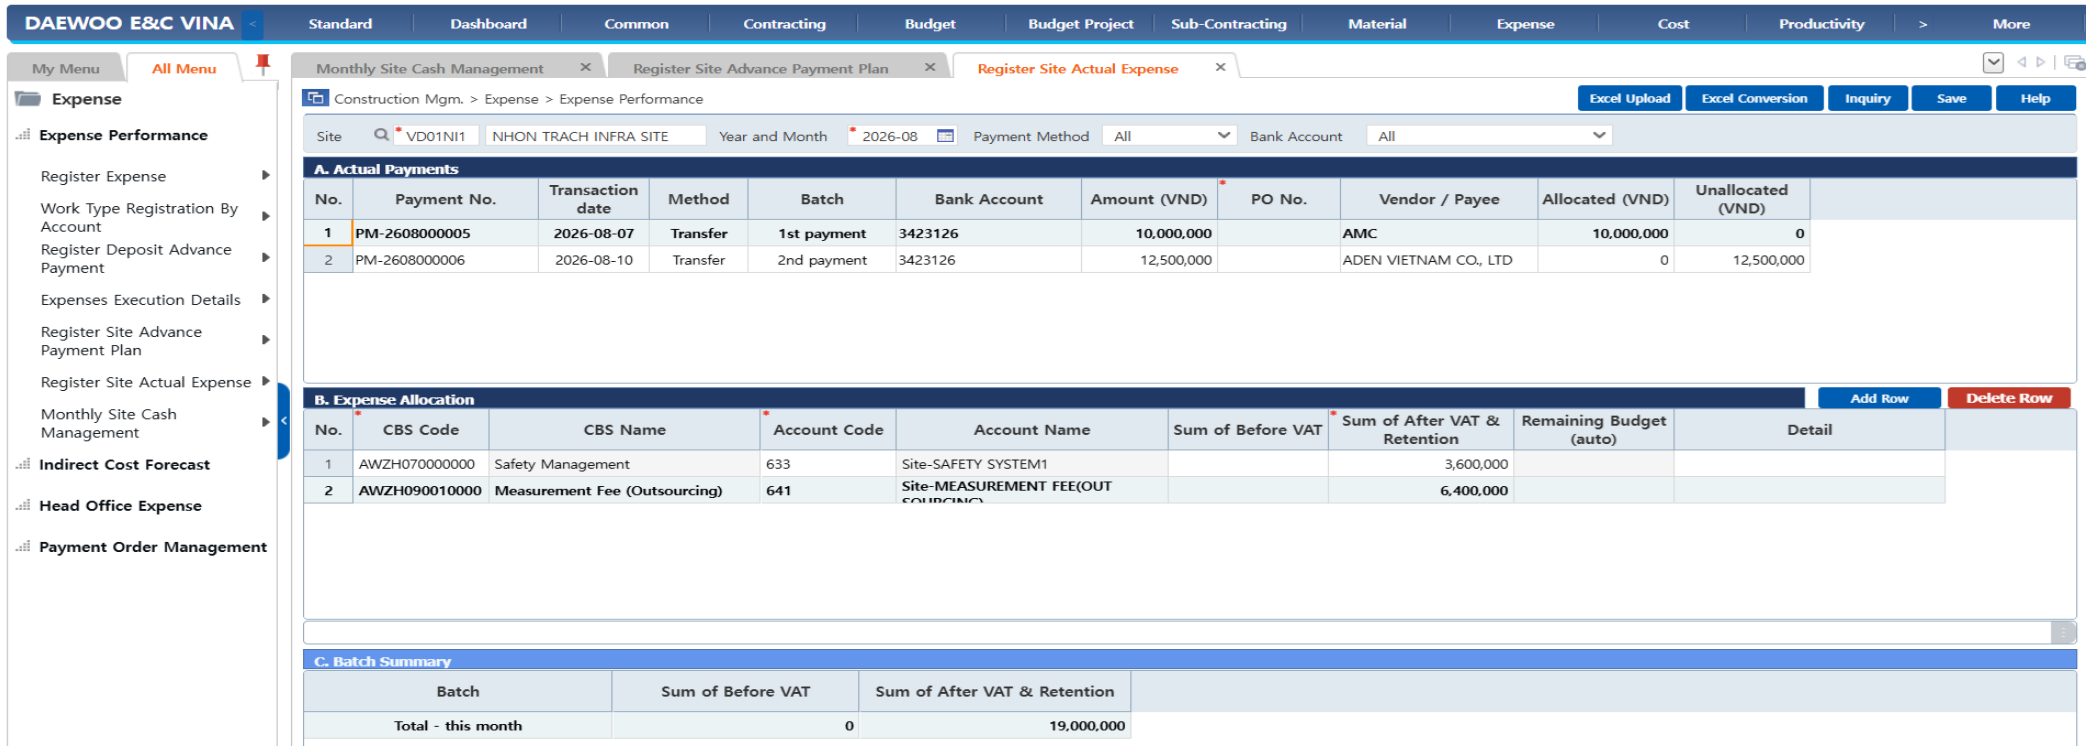

3

Register Site Actual Expense

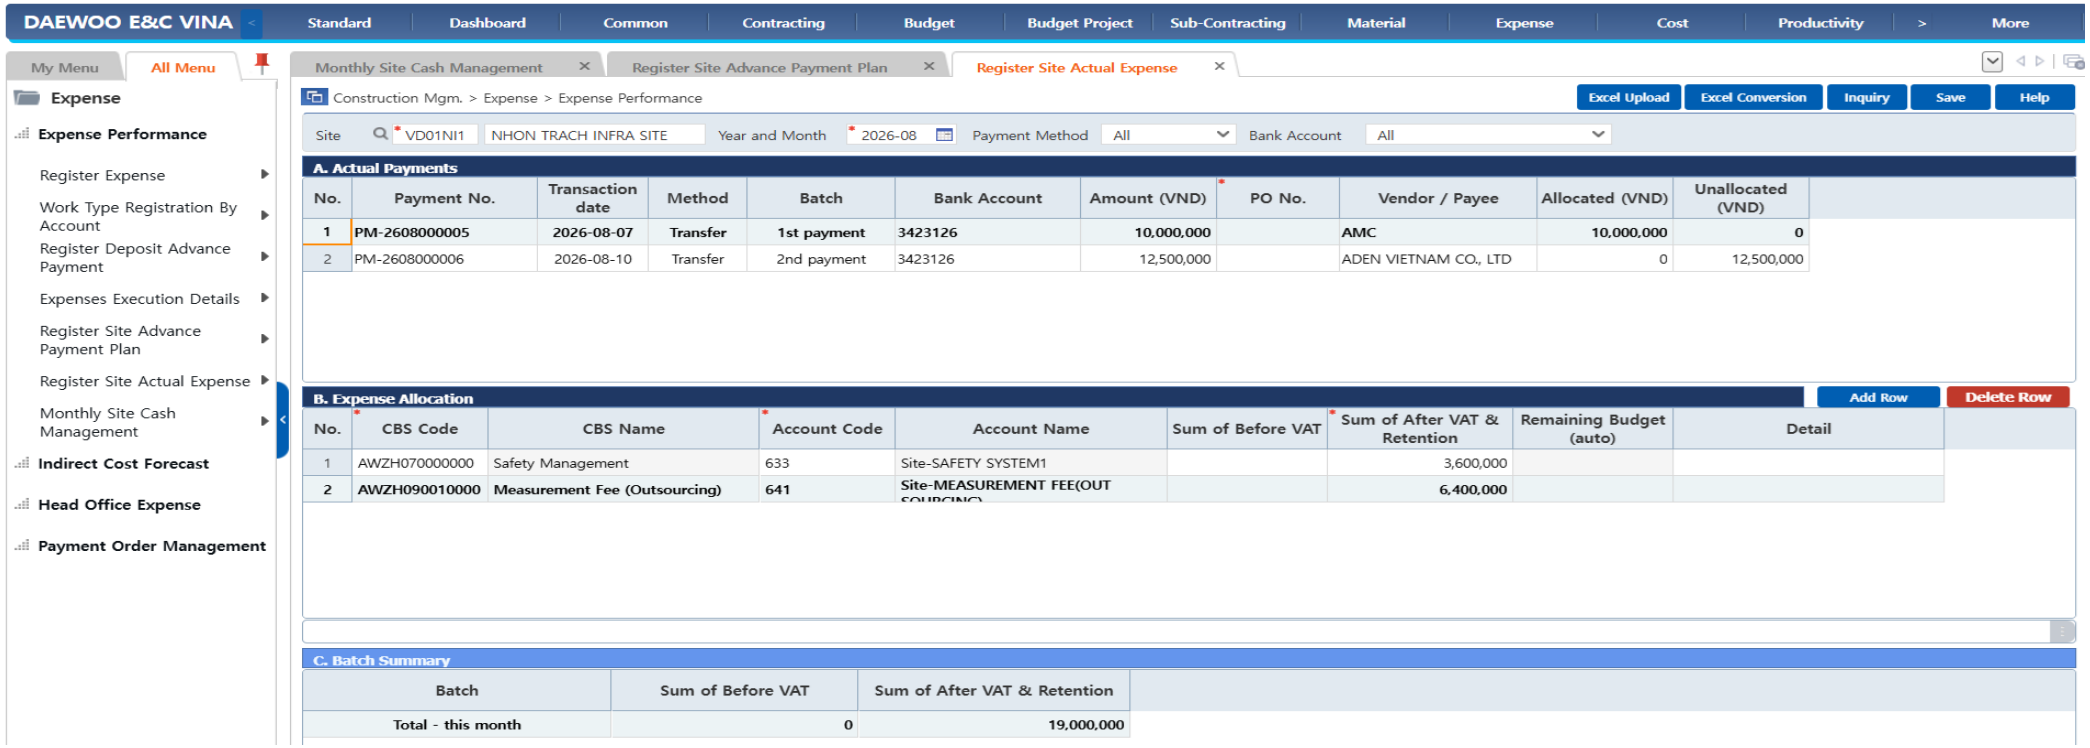

Register Site Actual Expense

- Go to **Expense > Expense Performance > Register Site Actual Expense**.
- Select **Site**, **Year and Month**, and optionally **Payment Method** and **Bank Account**, then click **Inquiry**.
- Section A — **Actual Payments** loads all Outcome transactions from the **Transaction List** (Cash Flow module) for the selected conditions. *This section is read-only.*
- The system automatically assigns each transaction to a payment batch (**Batch**):
  - *Transactions on the earliest transaction date → Batch 1st.*
  - *All transactions on subsequent dates → Batch 2nd (default).*
  - *If only one transaction date exists in the month, all transactions are assigned to 1st.*
  - The **Batch** field is editable per row. *A non-blocking warning appears if transactions on the same date are assigned to different batches.*

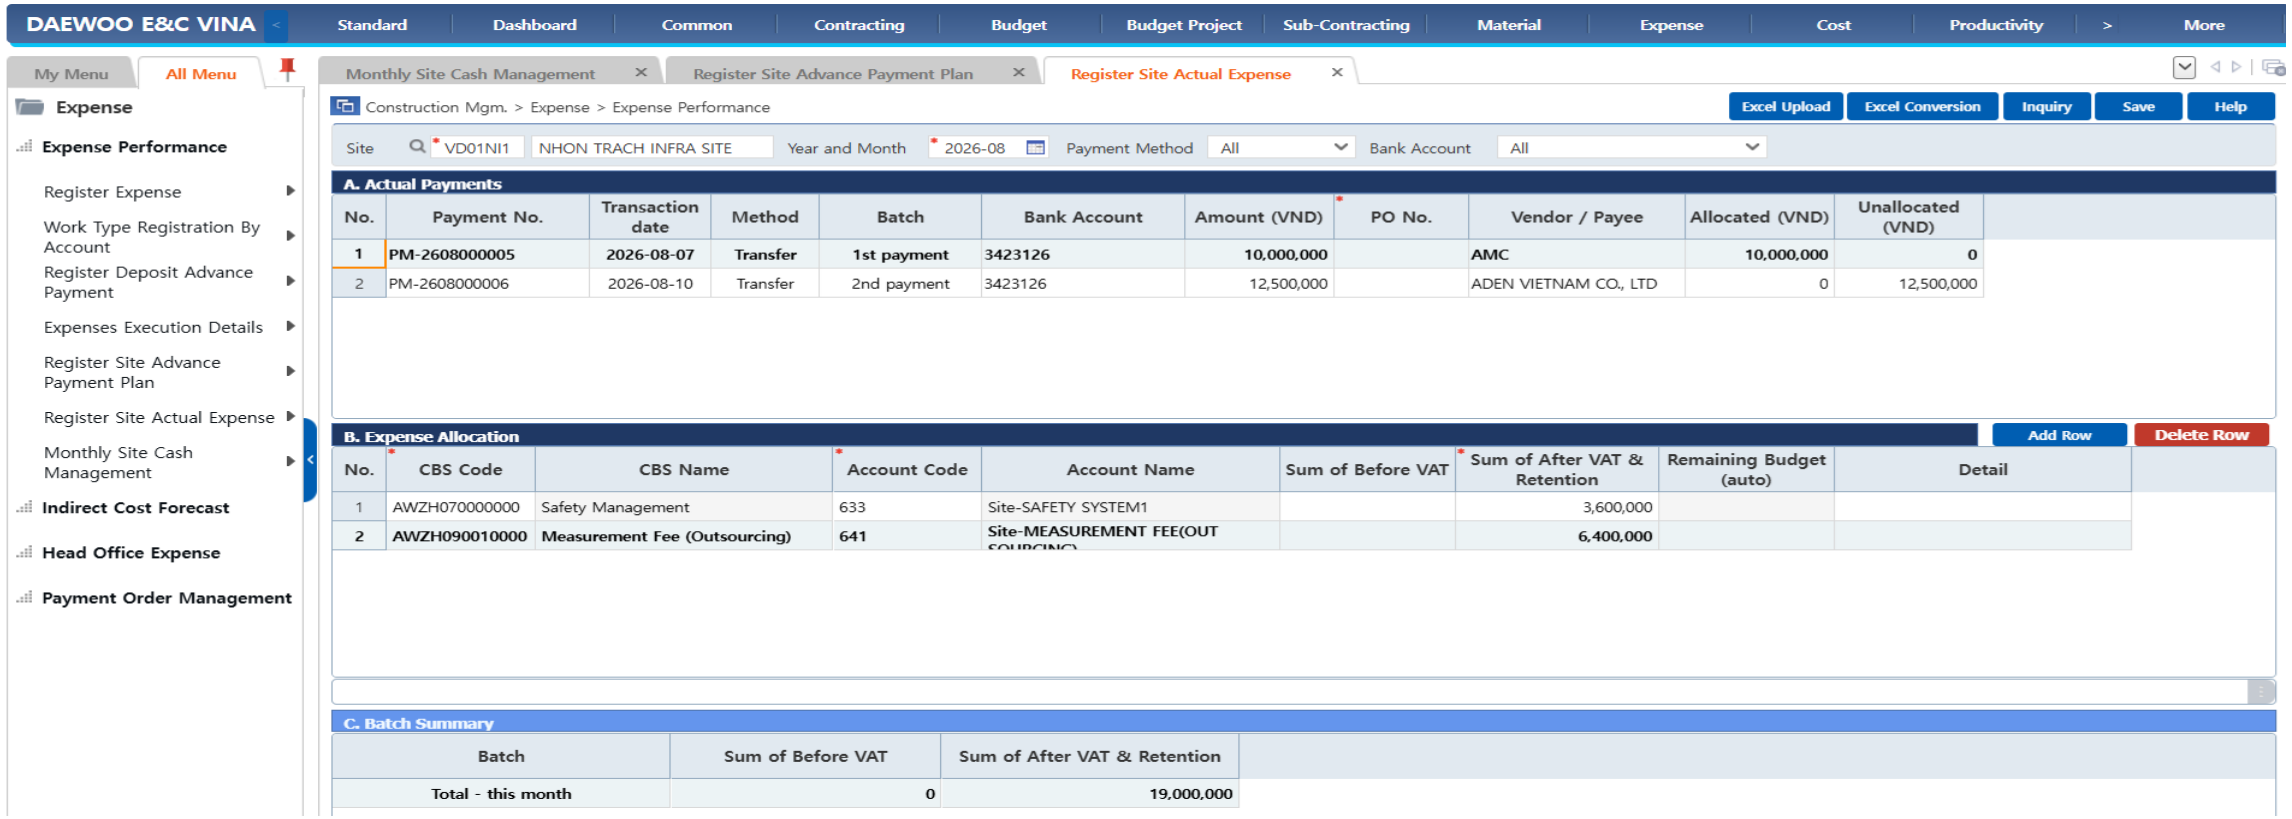

Register Site Actual Expense

- Click the **Sel** radio button on a transaction row to load its allocation in Section B — **Expense Allocation**.
- In Section B, click **Add Row** to allocate the selected transaction:
  - Select **CBS Name** (CBS Code fills in automatically). *Only CBS items with Use = checked in Register Standard Configuration are available.*
  - Select **Account Name** (Account Code fills in automatically).
  - Enter **Sum of After VAT & Retention**. *Amount must not exceed the Standard Value. Amount must not exceed the Remaining Budget. Total allocated across all rows for one transaction must not exceed the transaction's Amount (VND) — real-time block.*
  - Optionally enter **Sum of Before VAT** and **Detail** (free-text note, up to 300 characters).
- When clicking **Sel** to switch to another transaction, the current Section B data is temporarily saved in memory and restored when you return to that transaction.

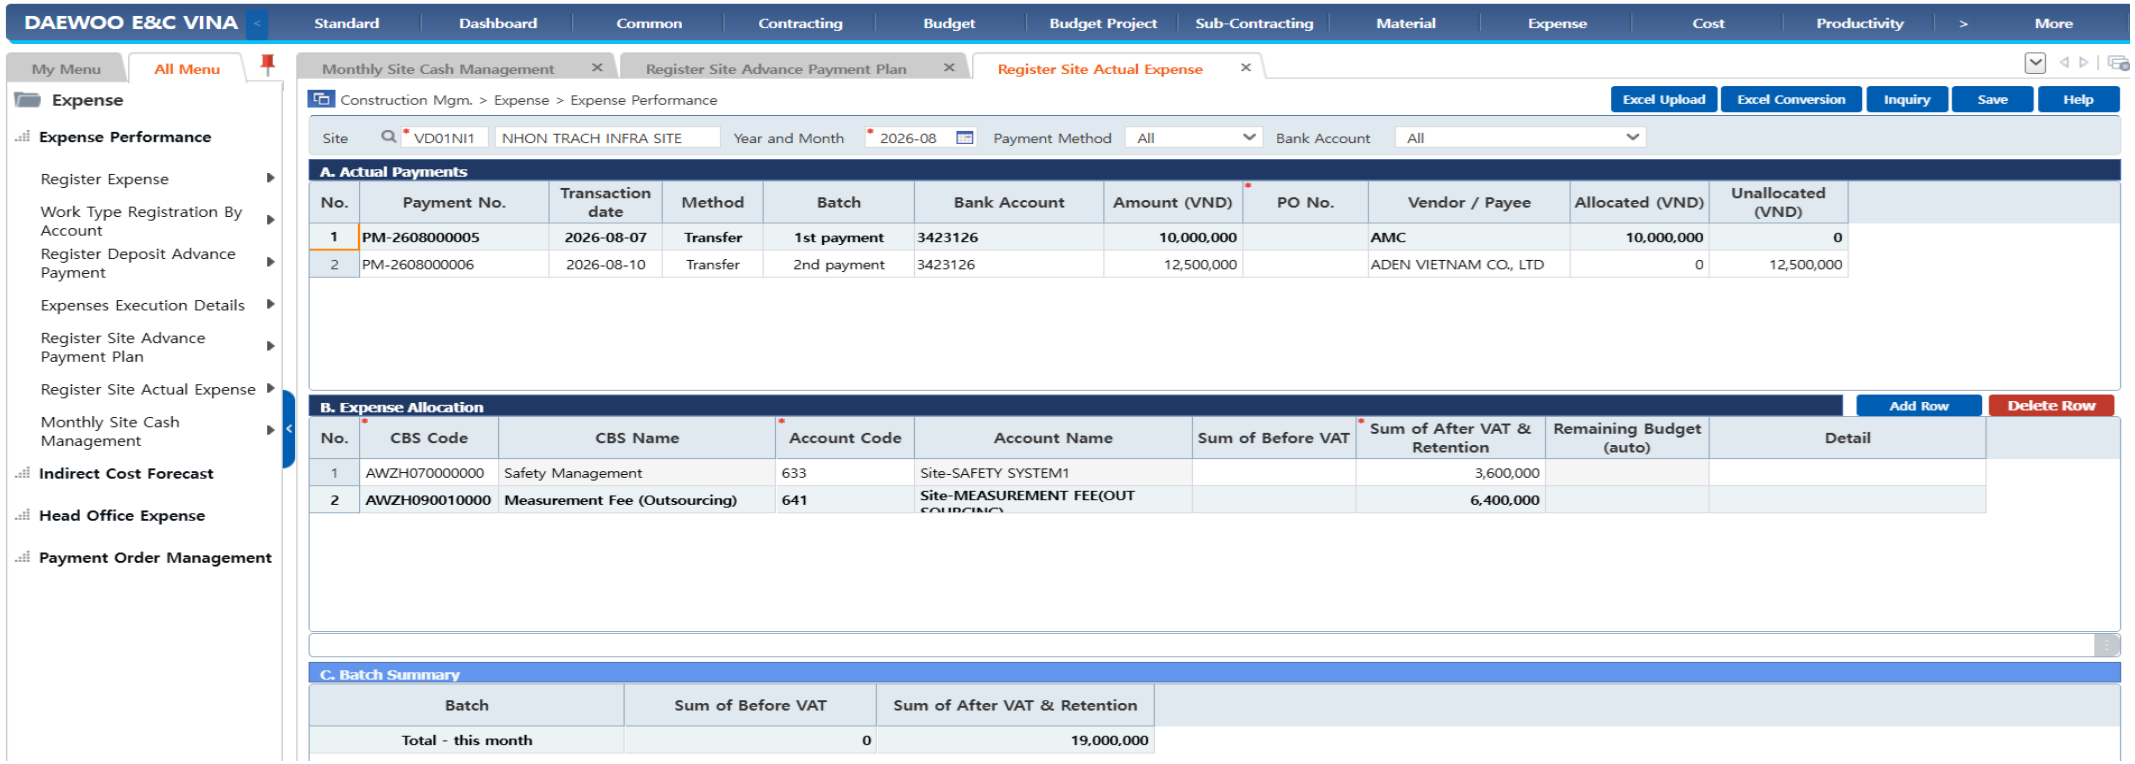

Register Site Actual Expense – Save & Batch Summary

- After allocating all transactions, click **Save**.
  - *If any transaction has Unallocated > 0 (transaction amount not fully allocated), the system displays a warning listing those transactions. Confirm to save the fully-allocated transactions and skip the rest; cancel to return and complete the allocation.*
  - *Transactions with no allocation rows at all are skipped — this is not treated as an error.*
  - *No transaction may have a negative Unallocated amount (over-allocation is blocked).*

Register Site Actual Expense – Save & Batch Summary

- Section C — **Batch Summary** shows the total Before VAT and After VAT & Retention amounts grouped by **1st payment / 2nd payment / Total this month**. *Section C reflects only data that has been saved successfully — unsaved changes are not included.*
- To upload allocations in bulk, click **Excel Upload** > **Download Excel Template**, fill in the required columns (Payment No., CBS Code Level 4, Accountant Code, Sum of After VAT & Retention), then **Upload Form Excel**. *All-or-nothing validation applies — if any row fails, no data is imported. Errors are returned in the uploaded file.*
- To export all data for the current filter, click **Excel Conversion**. Each allocation row is exported as a separate line; master transaction information is repeated across its detail rows.

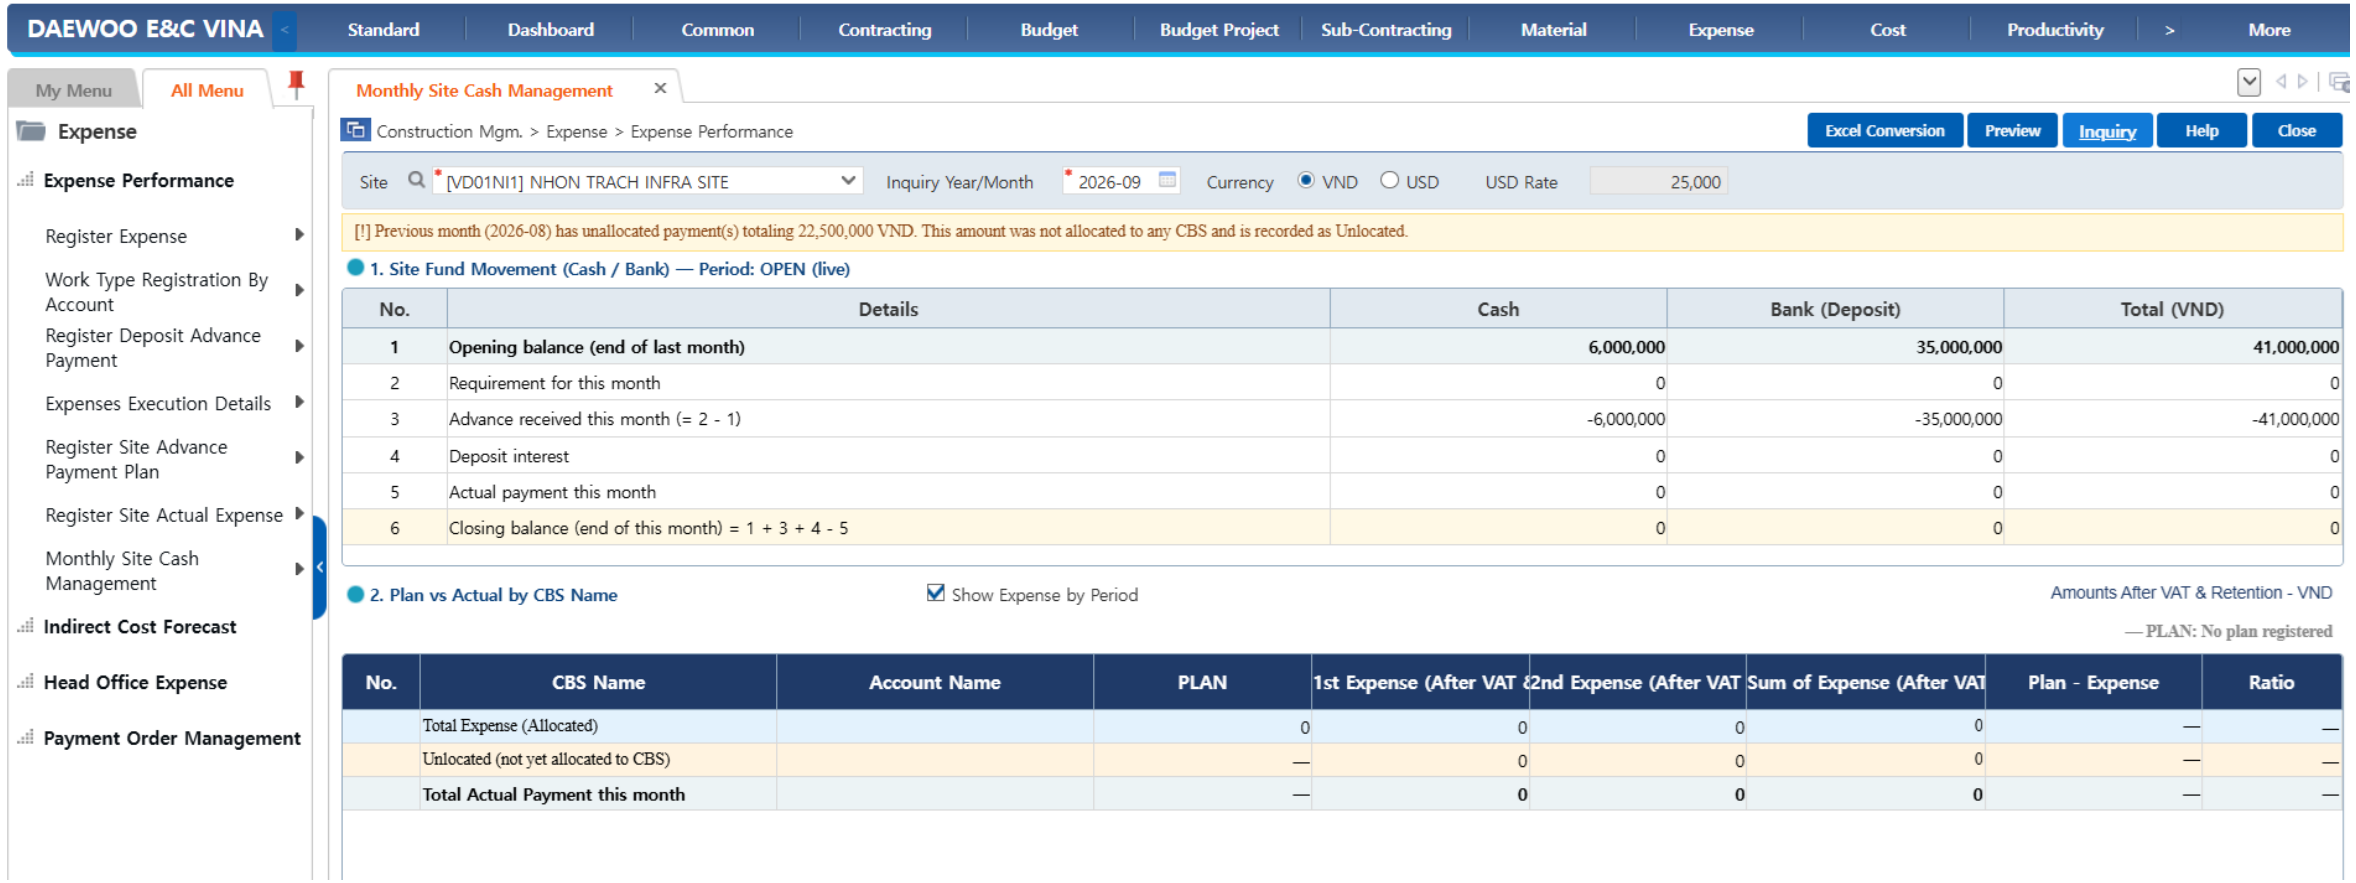

4

Monthly Site Cash Management

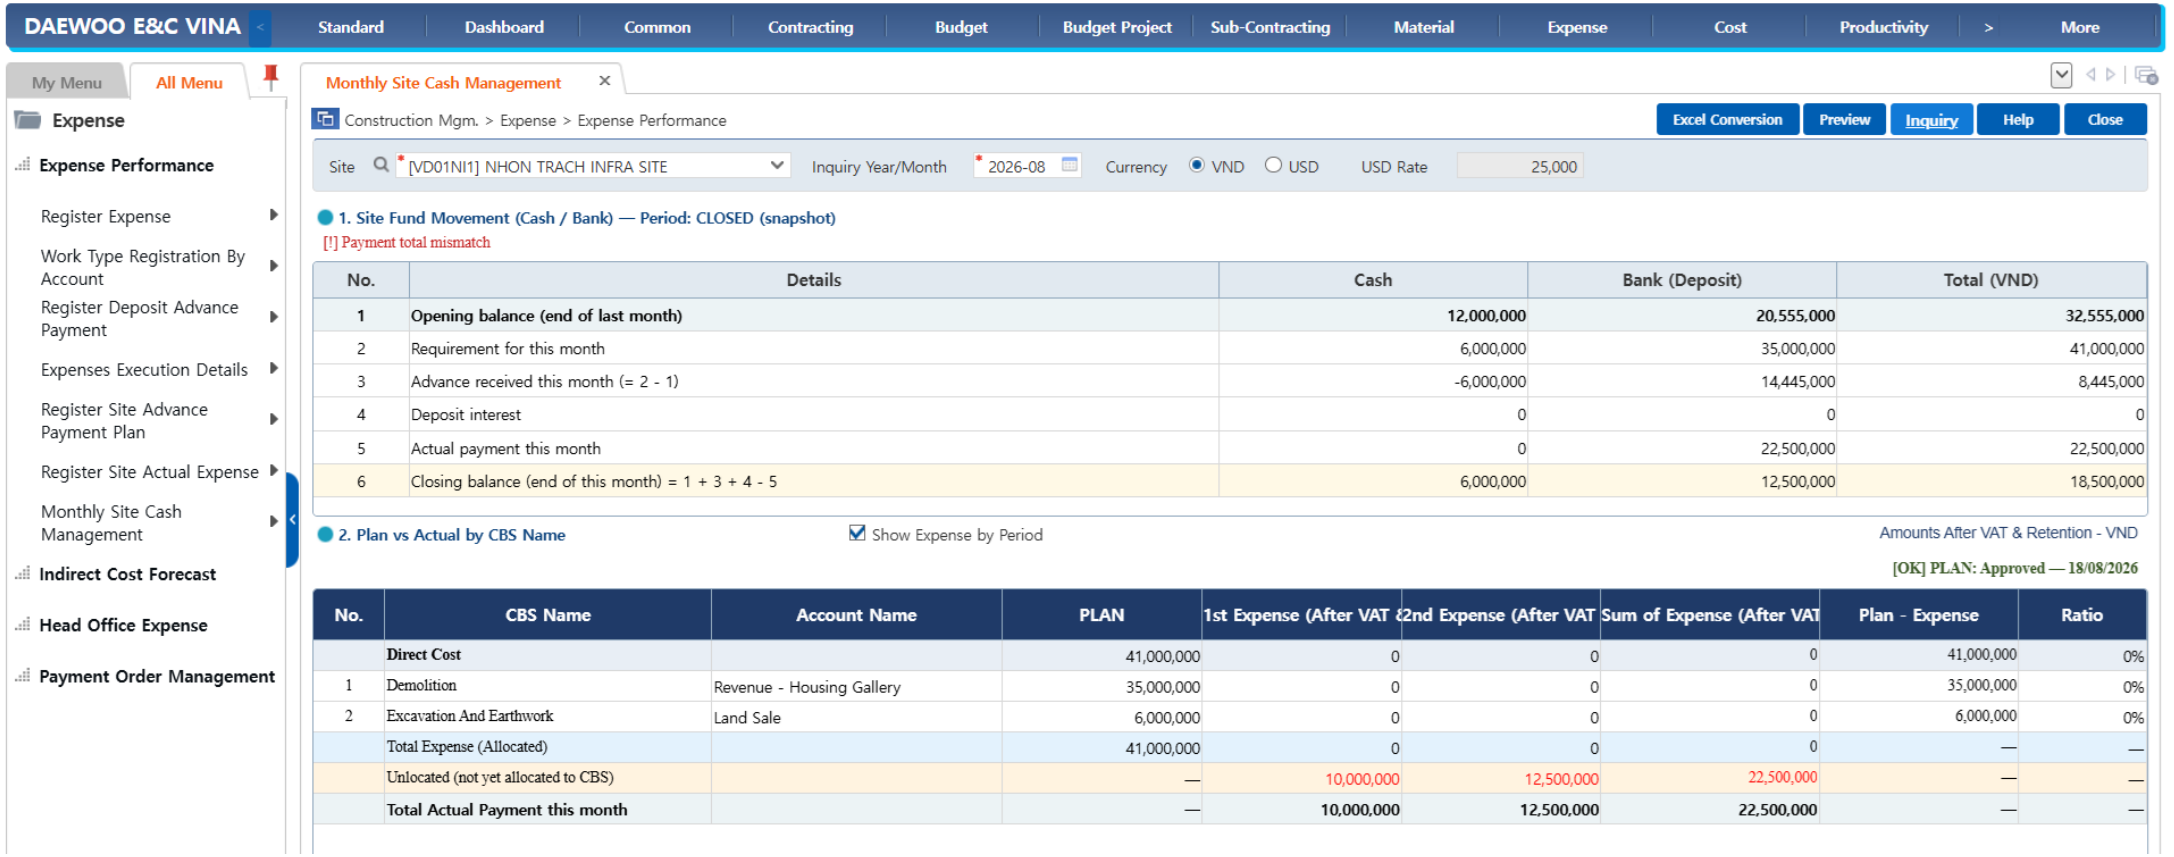

Monthly Site Cash Management

- Go to **Expense > Expense Performance > Monthly Site Cash Management**.
- Select **Site**, **Year and Month**, **Currency** (VND or USD), and **USD Rate** (auto-populated from Register Official Exchange Rate), then click **Inquiry**. *This report is read-only.*
- *If the previous month has unallocated payments (Unlocated > 0), a Warning Banner appears above Section 1 showing the total unallocated amount for that month.*

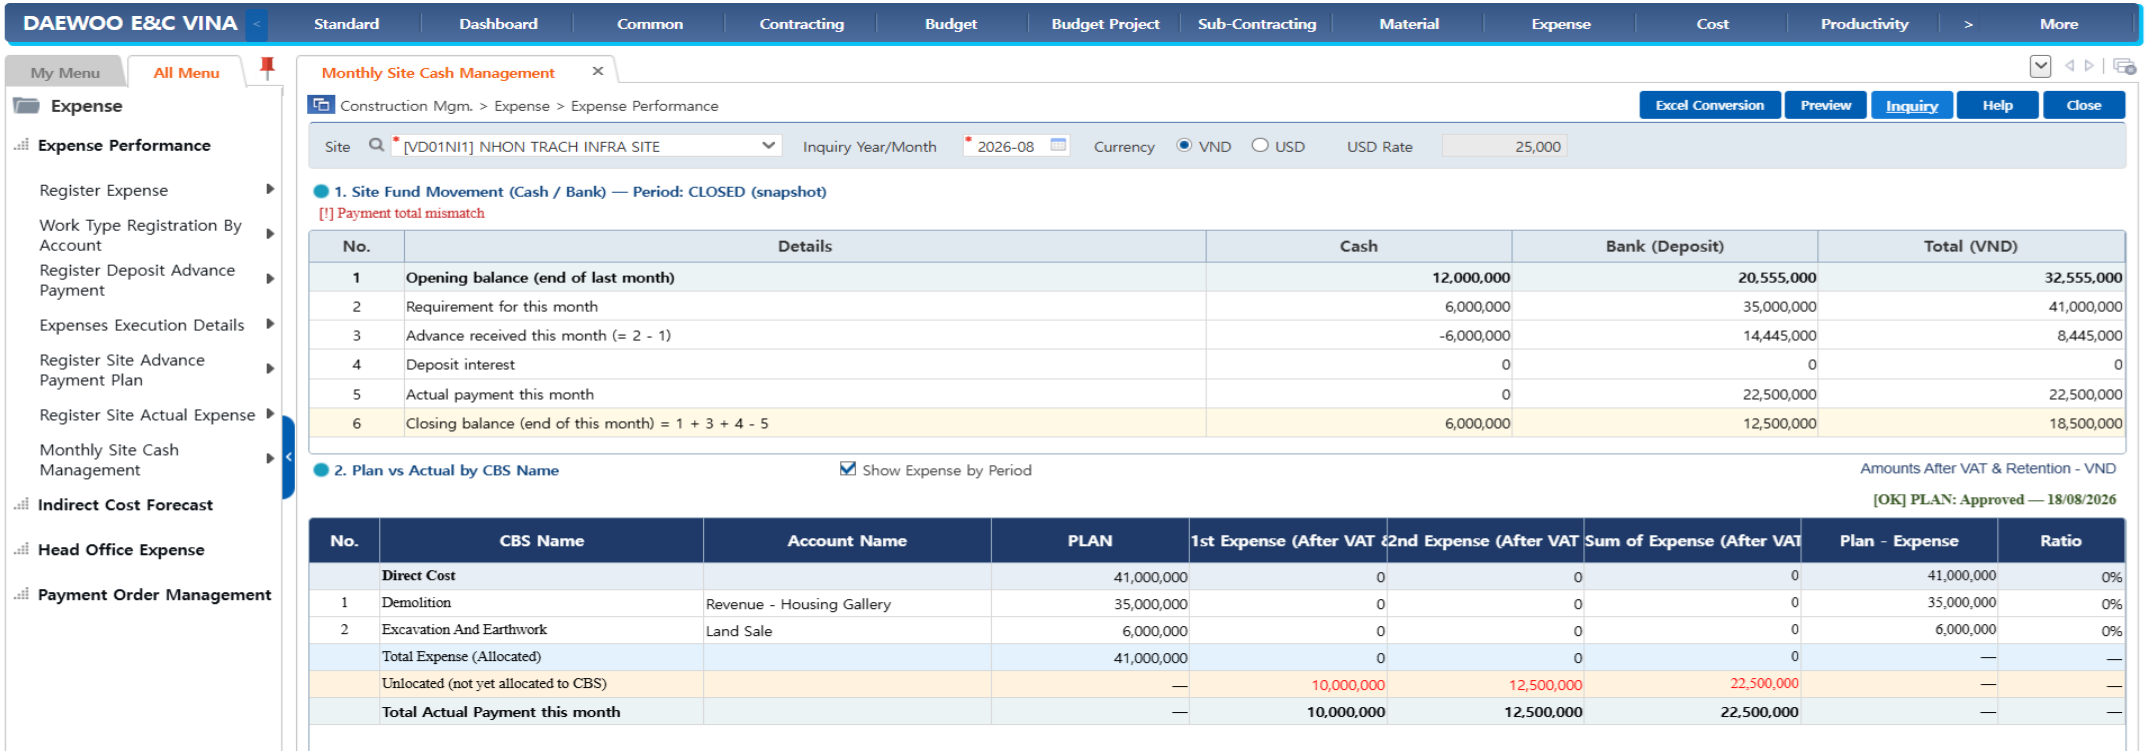

Monthly Site Cash Management

- **Section 1 — Site Fund Movement** (Cash / Bank) summarizes the fund position for the selected month: **Opening balance**: carried from the Closing balance of month N-1.
- **Requirement for this month**: from the Approved Advance Payment Plan (split by Transfer / Cash).
- **Advance received** = Requirement − Opening balance.
- **Deposit interest**: summed from Transaction List (Cash Flow Type = Deposit Interest).
- **Actual payment this month**: total Outcome from Register Site Actual Expense Section A (Allocated + Unallocated).
- **Closing balance** = Opening + Advance received + Deposit interest − Actual payment.

Monthly Site Cash Management

- **Section 2 — Plan vs Actual by CBS Name** shows a line-by-line comparison of planned vs. actual amounts by CBS:
  - Columns displayed: **PLAN**, **1st Expense**, **2nd Expense**, **Sum of Expense** (After VAT & Ret.), **Plan – Expense**, **Ratio (Expense / Plan)**.
  - Tick **Show Expense by Period** to show or hide the 1st and 2nd Expense columns.
  - A **Plan Status Indicator** shows: ✓ Approved / ⚠ Draft (pending approval) / — Not yet planned.
  - Footer rows: **Total Expense (Allocated)**, **Unlocated** *(amounts not allocated to any CBS — shown in red if > 0)*, and **Total Actual Payment this month** *(= Total Expense Allocated + Unlocated; must match Row 5 of Section 1)*.
- Click **Preview** to open a read-only PDF report (Download / Print / Close available inside the viewer).
- Click **Excel Conversion** to export the report to Excel.

No.	Details	Cash	Bank (Deposit)	Total (VND)
1	**Opening balance (end of last month)**	**12,000,000**	**20,555,000**	**32,555,000**
2	Requirement for this month	6,000,000	35,000,000	41,000,000
3	Advance received this month (= 2 - 1)	-6,000,000	14,445,000	8,445,000
4	Deposit interest	0	0	0
5	Actual payment this month	0	22,500,000	22,500,000
6	Closing balance (end of this month) = 1 + 3 + 4 - 5	6,000,000	12,500,000	18,500,000

No.	CBS Name	Account Name	PLAN	1st Expense (After VAT &	2nd Expense (After VAT	Sum of Expense (After VAT	Plan - Expense	Ratio
	Direct Cost		41,000,000	0	0	0	41,000,000	0%
